Appendix F – City Resolution

# 1 Background

## 1.1 Study Area

The City of Battle Creek is in Calhoun County in southwestern Michigan. It is located at the confluence of the Kalamazoo River and Battle Creek River. The City provides up to 23.8 million gallons a day (MGD) of clean drinking water to its residents and surrounding communities including Bedford Charter Township, Emmett Charter Township, Leroy Township, Pennfield Charter Township, Marshall Township, and the City of Springfield. The City has a population of about 50,000 people.

## 1.2 Existing Environmental Evaluation

A. Cultural and Historic Resources: Cultural and historic resources include 17 individual sites listed in the National Register of Historic Places. The City of Battle Creek has seven historic districts. These sites and districts are shown in Figure 1-1 and Table 1-1.

Figure 1-1: Map of Historical Districts and Sites

**Table 1-1 – List of Historical Districts and Sites**

Number	Name
1	Advent Historic District
2	Federal Center/Battle Creek Sanitarium (Boundary Increase)
3	Merritt Woods Historic District
4	Federal Center
5	Van Buren Street Historic District
6	Maple Street Historic District
7	City Hall Historic District
8	Milk Producers Company Barn
9	Kellogg, W.K., House
10	Record Printing and Box Company Building
11	Central National Tower
12	Old Merchants National Bank and Trust Co. Building
13	Arnold, Adam C., Block
14	Battle Creek Post Office
15	Battle Creek City Hall
16	Penn Central Railway Station
17	Penniman Castle

B. Air Quality – Current and Anticipated: Air quality was measured by the EPA's Air Quality Index (AQI). The AQI is an overall indicator of air quality, which takes into account several air pollutants. The last three years of AQI data for the core based statistical area (CBSA) of Kalamazoo-Portage, Michigan, which is the closest statistical area to the City of Battle Creek, are included in Table 1-2 below.

**Table 1-2 – Air Quality**

Air Quality of the Kalamazoo-Portage Core Based Statistical Area				
Year		2022	2023	2024
<b>Days with:</b>				
<b>AQI Value</b>	<b>AQI Value Meaning</b>			
AQI >0		352	358	366
0-50	AQI: Good	177	151	235
51-100	AQI: Moderate	172	198	131
101-150	AQI: Unhealthy for Sensitive Groups	3	6	0

151-200	AQI: Unhealthy	0	2	0
201-300	AQI: Very Unhealthy	0	1	0
>300	AQI: Hazardous	0	0	0
Major Contributing Pollutant, Number of Days				
Carbon Monoxide, CO		0	0	0
Nitrogen Dioxide, NO <sub>2</sub>		0	0	0

Particulate Matter 2.5μm, PM2.5		255	263	235
Particulate Matter 10μm, PM10		0	0	0
Maximum AQI		134	225	100
90th Percentile AQI		69	70	63
Median AQI		50	53	44.5

Data sourced from: <https://www.epa.gov/outdoor-air-quality-data/air-quality-index-report>

\* Statistics for 2024 not final until May 1, 2025.

- C. Wetlands: Wetlands are present throughout the water distribution system. They are mostly adjacent to the Kalamazoo River, Battle Creek River, and their tributaries, but others exist around unconnected lakes and rivers. A map of the wetlands is shown in Appendix A. Typically, homes and businesses are not constructed in wetland, and it is not expected that their water services will have been either. In the event wetlands are encountered, proposed project will minimize excavation or fill inside of the wetlands and will submit for and comply with all required State and Federal permits.
- D. Great Lakes Shorelands, Coastal Zones, and Coastal Management Areas: There are no coastal areas present in the service area.
- E. Floodplains: Floodplains exist around the Kalamazoo River and its tributaries. A FEMA floodplain map is shown in Appendix A.
- F. Natural or Wild and Scenic Rivers: There are no designated Natural or Wild and Scenic Rivers within the service area. The Kalamazoo River does flow into the Lower Kalamazoo River at the northwest exit from Lake Allegan, which is a designated Natural River.
- G. Major Surface Waters: The USGS topographical map located in Appendix A shows the lakes, rivers, and ponds within and surrounding the City. The Kalamazoo River divides into the Battle Creek River northeast of the City. Goguac Lake is a large lake in the City limits, and there are various smaller lakes outside the City. These include Beadle Lake southeast of the City, Spring Lake to the northeast, and Hamlin Lake to the north. The green shaded areas indicate vegetated areas, including woods and wetlands. The City has various parks which are depicted in the green shaded areas. The figure shows lakes and rivers within the study area, as well.
- H. Topography: A USGS topographical map is included in Appendix A.
- I. Geology: A geological map of Calhoun County is included in Appendix A.

J. Soil Types: Soil types are shown below in Table 1-2.

**Table 1-3 – Project Area Soils**

City of Battle Creek		
Soil Type	Acres	% of Area
Coloma loamy sand, 0 to 6 percent slopes	520.1	2.50%
Coloma loamy sand, 6 to 12 percent slopes	519.4	2.50%
Coloma loamy sand, 12 to 18 percent slopes	225.5	1.10%
Coloma loamy sand, 18 to 40 percent slopes	175.4	0.80%
Spinks loamy sand, 0 to 6 percent slopes	713.8	3.50%
Spinks loamy sand, 6 to 12 percent slopes	667.5	3.20%
Spinks loamy sand, 12 to 18 percent slopes	575.3	2.80%
Spinks loamy sand, 18 to 40 percent slopes	82.8	0.40%
Bronson sandy loam, 0 to 6 percent slopes	78.6	0.40%
Oshtemo sandy loam, 0 to 6 percent slopes	977.7	4.70%
Oshtemo sandy loam, 6 to 12 percent slopes	530.2	2.60%
Oshtemo sandy loam, 12 to 18 percent slopes	469.5	2.30%
Oshtemo sandy loam, 18 to 35 percent slopes	98.4	0.50%
Boyer sandy loam, 0 to 6 percent slopes	709.9	3.40%
Boyer sandy loam, 6 to 12 percent slopes	434.1	2.10%
Boyer sandy loam, 12 to 18 percent slopes	500.3	2.40%
Boyer sandy loam, 18 to 40 percent slopes	127.1	0.60%
Leoni gravelly loam, 0 to 6 percent slopes	14.7	0.10%
Kalamazoo loam, 0 to 2 percent slopes	396.7	1.90%
Kalamazoo loam, 2 to 6 percent slopes	371.7	1.80%
Kalamazoo loam, 6 to 12 percent slopes	119.7	0.60%
Kalamazoo loam, 12 to 18 percent slopes	176.5	0.90%
Riddles loam, 0 to 6 percent slopes	4.2	0.00%
Brady sandy loam, 1 to 4 percent slopes	296	1.40%
Matherton loam, 0 to 3 percent slopes	23.1	0.10%
Sleeth loam, 0 to 2 percent slopes	4.9	0.00%
Algansee fine sand, occasionally flooded	17.7	0.10%
Granby loamy sand, 0 to 2 percent slopes	7.5	0.00%
Gilford fine sandy loam, 0 to 2 percent slopes, gravelly subsoil	122.5	0.60%
Cohoctah loam, gravelly substratum, frequently flooded	183	0.90%
Sebewa loam, 0 to 2 percent slopes	7.9	0.00%
Udipsammements and Udoorthents, nearly level to steep	1,402.50	6.80%

Pits, sand and gravel	122.8	0.60%
Histosols and Aquents, ponded	127.1	0.60%
Histosols and Fluvaquents, frequently flooded	273.9	1.30%
Coloma-Boyer loamy sands, 0 to 6 percent slopes	22.7	0.10%
Coloma-Boyer loamy sands, 12 to 18 percent slopes	31.6	0.20%
Urban land-Kalamazoo complex, 0 to 6 percent slopes	828.9	4.00%
Urban land-Kalamazoo complex, 6 to 12 percent slopes	6.9	0.00%
Urban land-Oshtemo complex, 0 to 6 percent slopes	3,844.90	18.60%
Urban land-Oshtemo complex, 6 to 12 percent slopes	504.6	2.40%
Urban land-Oshtemo complex, 12 to 18 percent slopes	263.8	1.30%
Urban land	1,407.70	6.80%
Urban land-Coloma complex, 0 to 6 percent slopes	1,076.10	5.20%
Urban land-Coloma complex, 6 to 12 percent slopes	195.7	0.90%
Adrian muck, 0 to 1 percent slopes	160.2	0.80%
Houghton muck, undrained, 0 to 1 percent slopes	792.7	3.80%
Palms muck, 0 to 1 percent slopes	15.7	0.10%
Water	450.8	2.20%
<b>Total</b>	<b>20,683.60</b>	<b>100.00%</b>

K. Agricultural Resources: Most of the service area is urban or suburban, with some croplands located in the southwest portion of the City. These agricultural lands are outside of the proposed project area.

L. Fauna and Flora: Flora and fauna of special concern or listed Federally or by the State of Michigan are included in the following Table 1-3. Habitats are included in Table 1-4.

**Table 1-4 – Flora and Fauna**

Scientific Name	Common Name	Federal Status	State Status
<i>Acella haldemani</i>	Spindle lymnaea		SC
<i>Acris blanchardi</i>	Blanchard's cricket frog		T
<i>Agrimonia rostellata</i>	Beaked agrimony		SC
<i>Alasmidonta marginata</i>	Elktoe		SC
<i>Alasmidonta viridis</i>	Slippershell		T

<i>Ammodramus savannarum</i>	Grasshopper sparrow		SC
<i>Amorpha canescens</i>	Leadplant		SC
<i>Angelica venenosa</i>	Hairy angelica		SC
<i>Arnoglossum plantagineum</i>	Prairie indian-plantain		SC
<i>Baptisia lactea</i>	White or prairie false indigo		T
<i>Bombus auricomus</i>	Black and gold bumble bee		SC
<i>Bombus fervidus</i>	Yellow bumble bee		SC
<i>Bombus pensylvanicus</i>	American bumble bee		E
<i>Brickellia eupatorioides</i>	False boneset		SC
<i>Cambarunio iris</i>	Rainbow		SC
<i>Carex amphibola</i>	Narrow-leaved sedge		SC
<i>Centronyx henslowii</i>	Henslow's sparrow		E
<i>Clemmys guttata</i>	Spotted turtle		T
<i>Conioselinum chinense</i>	Hemlock-parsley		SC
<i>Corydalis flavula</i>	Yellow fumewort		T
<i>Cryptotis parva</i>	Least shrew		T
<i>Cygnus buccinator</i>	Trumpeter swan		SC
<i>Cypripedium candidum</i>	White lady slipper		T
<i>Dichanthelium leibergii</i>	Leiberg's panic grass		T
<i>Dichanthelium microcarpon</i>	Small-fruited panic-grass		X
<i>Eleocharis compressa</i>	Flattened spike rush		T
<i>Eleocharis engelmannii</i>	Engelmann's spike rush		SC
<i>Eleocharis radicans</i>	Spike rush		E
<i>Emydoidea blandingii</i>	Blanding's turtle		SC
<i>Epioblasma triquetra</i>	Snuffbox	LE	E
<i>Erimyzon claviformis</i>	Creek chubsucker		E
<i>Eryngium yuccifolium</i>	Rattlesnake-master or button snakeroot		E
<i>Erynnis martialis</i>	Mottled duskywing		SC
<i>Eupatorium sessilifolium</i>	Upland boneset		T
<i>Falco peregrinus</i>	Peregrine falcon		T
<i>Faxonius immunis</i>	Calico crayfish		SC
<i>Filipendula rubra</i>	Queen-of-the-prairie		T
<i>Fontigens nickliniana</i>	Watercress snail		SC
<i>Fraxinus profunda</i>	Pumpkin ash		T
<i>Galearis spectabilis</i>	Showy orchis		T
<i>Geum virginianum</i>	Pale avens		T
<i>Haliaeetus leucocephalus</i>	Bald eagle		SC
<i>Helianthus hirsutus</i>	Whiskered sunflower		SC
<i>Helianthus mollis</i>	Downy sunflower		T
<i>Hydrastis canadensis</i>	Goldenseal		T
<i>Isotria verticillata</i>	Whorled pogonia		T

<i>Lasmigona compressa</i>	Creek heelsplitter		SC
<i>Lasmigona costata</i>	Flutedshell		SC
<i>Lechea minor</i>	Least pinweed		T
<i>Lepisosteus oculatus</i>	Spotted gar		SC
<i>Lepyrtonia angulifera</i>	Angular spittlebug		SC
<i>Ligumia recta</i>	Black sandshell		T
<i>Lithobates palustris</i>	Pickerel frog		SC
<i>Mediappendix protracta</i>	A land snail (no common name)		E
<i>Mertensia virginica</i>	Virginia bluebells		T
<i>Mesomphix cupreus</i>	Copper button		SC
<i>Moxostoma carinatum</i>	River redhorse		T
<i>Myotis septentrionalis</i>	Northern long-eared bat	LE	T
<i>Myotis sodalis</i>	Indiana bat	LE	E
<i>Necturus maculosus</i>	Mudpuppy		SC
<i>Nerodia erythrogaster neglecta</i>	Copper-bellied water snake	LT	E

<https://mnfi.anr.msu.edu/resources/county-element-data>

### 1.3 Need for the Project

The City currently has 3781 lead service lines or galvanized service lines that were previously connected to lead and 871 water service lines of unknown material that must be verified. A list of addresses with service line materials is included as Appendix B. A map of the proposed project area is included in Appendix A. In order to comply with Michigan's Lead and Copper Rule (LCR), all lead service lines and galvanized service lines that were previously connected to lead must be removed and replaced. The service lines of unknown material must be verified and replaced if they are also lead.

## 2 Analysis of Alternatives

### 2.1 Regionalization

The City of Battle Creek provides drinking water distribution to the residences and businesses within the City and surrounding Townships. Regionalization would not bring the City into compliance with Michigan LCR, so this alternative will not be examined further.

### 2.2 Replacement

In order to comply with Michigan's Lead and Copper Rule (LCR) a total of 3781 lead service lines or galvanized services lines previously connected to lead will be replaced. Another 871 water service lines will have material verified and replaced if found to be lead or galvanized previously connected to lead. In most cases, the work may include replacement of plumbing inside the building to the extent required by the LCR. Replacement is the only alternative that would bring the City into compliance with the LCR.

### 2.3 Monetary Evaluation

Replacement of lead service lines is the least costly alternative that will bring the City into compliance with the Lead and Copper Rule. A breakdown of estimated construction costs can be seen in Table 2-1 below and a net present worth calculation is presented in Table 2-2.

Table 2-1 – Estimated Construction Cost

Item No.	Description	Estimated Quantity	Unit	Unit Price	Amount
1	General Conditions/Mobilization	1.0	LS	\$1,692,066.00	\$1,692,066.00
2	Lead Service Line Replacement	3,781.0	EA	\$4,360.00	\$16,485,160.00
3	Verify Water Service Line Material	871.0	EA	\$500.00	\$435,500.00
<b>Sub Total</b>					<b>\$18,612,726</b>
<b>Contingencies @ 20.0%</b>					<b>\$3,722,500</b>
<b>Total Estimated Construction Cost</b>					<b>\$22,335,226</b>
<b>Design Engineering Services @ 10.0%</b>					<b>\$2,233,500</b>
<b>Construction Engineering Services @ 10.0%</b>					<b>\$2,233,500</b>
<b>Planning, Administrative &amp; Legal @ 5%</b>					<b>\$1,116,800</b>
<b>Total</b>					<b>\$27,919,026</b>

**Table 2-2 – Net Present Worth**

<b>Lead Service Line Replacement</b>	
Initial Capital Costs	\$27,919,026
Annual O&M Costs	\$35,759
Future Salvage Value	\$16,751,416
Present Worth of 20 Years of O&M	\$573,575
Present Worth of 20-Year Salvage Value	\$10,840,108
Net Present Worth	\$17,652,493
<b>Annual Cost Per Meter*</b>	<b>\$50.81</b>
Based on Real Discount Rate of 2.2% for 20-Year Planning Period; 50-Year Useful Life	
<b>*See breakdown of equivalent meters and per meter cost in Section 3.4 and Table 3-2.</b>	

## **2.4 Environmental Evaluation**

### **2.4.1 Direct and Indirect Impacts**

- A. Wetlands: The proposed alternative should not impact any wetlands.
- B. Floodplains: The proposed alternative should not impact any floodplains.
- C. Land/Water Resources: The proposed alternative should not impact any land or water resources.
- D. Historic/Tribal Resources: The proposed alternative should not impact any historical resources. The City will conduct an evaluation by a qualified architectural historian and archaeologist as part of the Michigan State Historic Preservation Office's (SHPO) Section 106 Consultation. The local Tribal Historic Preservation Office (THPO) has also been contacted regarding the proposed project. Letters sent to the THPO and any responses received are included in Appendix C.
- E. Endangered Flora/Fauna: The proposed alternative should not adversely impact any endangered flora or fauna. The US Fish and Wildlife Service concurs that the proposed alternative project scope will have no effect or is unlikely to adversely affect any endangered or threatened species that may be present in the proposed project area. The USFWS Official Species List and Concurrence Letter are included in Appendix C. A Rare Species Review has been performed by the Michigan Natural Features Inventory (MNFI) for the proposed alternative project area and is attached in Appendix C.

## 3 Selected Alternative

### 3.1 Design Parameters

All lead service line replacement work shall comply with the City of Battle Creek Special Provision for Water Main specifications approved by EGLE on February 20, 2024. City Special Provisions, as approved by EGLE, can be reviewed in Appendix D.

### 3.2 Useful Life

The useful life of HDPE water services is expected to be greater than 50 years.

### 3.3 Schedule for Design and Construction

The proposed construction schedule for the replacement of the lead water services would cover approximately four years from August 2026 to December 2030.

**Table 3-1 – Project Schedule**

### **B-Bid Advertisement**

DRAK

### 3.4 Project User Costs

The annual debt service for the proposed project is estimated to be \$1,738,078, at 2.2 percent interest over a 20-year term, based on an estimated year 1 project cost of \$27,919,026.

The debt service would be paid through the readiness-to-serve charge in the System's water rates. The readiness-to-serve charge is based on the number of equivalent meters in the City's water system. The number of equivalent meters is based on AWWA standard ratios where a 5/8-inch residential meter is equal to 1.00 equivalent meters. There are 34,111 existing equivalent meters in the City's water system which are subject to debt service for the water treatment facility.

As a result, the annual debt service is equal to \$50.81 per equivalent meter (\$1,733,052/34,111 equivalent meters). Since the City bills its customers on a monthly basis, the annual debt service would be equal to \$4.23 per equivalent meter per month. Therefore, the cost impact the proposed project would have on a residential customer would be \$4.23 per month. The equivalent meters and cost breakdown are shown in Table 3-2.

**Table 3-2 – Equivalent Meters and Cost Breakdown**

Meter Size	AWWA Equivalent Meter (EM) Ratio	Battle Creek		Outside City		Total		Annual Cost Increase	Monthly Cost Increase	Monthly Cost Increase
		# of Meters	# of EM	# of Meters	# of EM	# of Meters	# of EM			
5/8"	1	10,831	10,831	2,486	2,486	13,317	13,317	\$676,637	\$56,386	\$4.23
3/4"	1.5	4,564	6,846	305	458	4,869	7,304	\$371,116	\$30,926	\$6.35
1"	2.5	747	1,868	153	383	900	2,250	\$114,323	\$9,527	\$10.58

	<b>Total</b>	<b>16,980</b>	<b>28,778</b>	<b>3,169</b>	<b>5,333</b>	<b>20,149</b>	<b>34,111</b>	<b>\$1,733,180</b>	<b>\$144,432</b>	

## 4 Environmental and Public Health Impacts

### 4.1 Direct

#### 4.1.1 Construction Impacts

- A. Project Area: The proposed project will cover much of the City's residential neighborhoods. Construction will occur in the rights-of-way as expected ground disturbance at each site will be five feet deep, 10 feet wide, and the length from the center of the road to the front of each house. There is potential for some tree removal.
- B. Floodplains: The proposed work should not impact any floodplains
- C. Wetlands: The proposed work should not impact any wetlands.
- D. Stream Crossings: The proposed work is not expected to require any stream crossings.
- E. Shorelands: The proposed work should not impact any shorelands.
- F. Prime or Unique Agricultural Lands: There is no prime or unique agricultural land in the project area.
- G. Construction Methods: The proposed work will be constructed through open cut trenching or directional drilling. Expected ground disturbance at each open cut site will be five feet deep, 10 feet wide, and the length from the center of the road to the front of each house and/or business.
- H. Rare, Threatened, Endangered Species: As included above in Table 1-4 (above), there are six federally endangered or threatened species identified in Calhoun County per the Michigan Natural Features Inventory (MNFI). A Rare Species Review has been performed MNFI for the project area and is attached in Appendix C. An Official Species List has been generated by the US Fish and Wildlife Service (USFWS) that lists three federally endangered or threatened species that may be present within the project area. USFWS has concurred that project activity will not affect or is unlikely to adversely affect these species. The Official Species List and the concurrence letter from USFWS are included in Appendix C.
- I. Archaeological, Historical, and Cultural Resources: No impacts to historical sites are anticipated. The project area does intersect with several historical districts and historical sites, but the replacement of lead service lines will not alter any historical buildings or landmarks. The City will complete a consultation with the Michigan State Historic Preservation Office (SHPO) to ensure compliance with the Section 106 of the National Historic Preservation Act of 1966 which includes evaluation of the project area by a qualified architectural historian and archaeologist. The local Tribal Historic Preservation Office (THPO) has also been contacted in compliance with Section 106. These communications are included in Appendix C.

- J. Traffic Impacts: Traffic will be impacted by the proposed work during construction. Construction will be phased and there will be consideration for access to residences and for emergency vehicles.
- K. Surface and Groundwater: The proposed work will not impact surface or groundwater.

#### **4.1.2 Operational Impacts**

There are no operational impacts from the proposed work.

#### **4.1.3 Social Impacts**

- A. User Cost: There is not expected to be a large increase in water rates
- B. Construction Jobs: The proposed project may increase job opportunities in the City.
- C. Traffic: Traffic patterns will be disturbed during construction. Construction will be phased to mitigate the impact and there will be consideration for access to residences and routes for emergency vehicles. Public outreach and education will be included in the project.

### **4.2 Indirect**

- A. Changes in the rate, density, or type of development (residential/commercial/industrial): The proposed projects will have no impact on development in the service area. No capacity is being created or reduced by the project
- B. Changes in land use (e.g. open space, floodplains, prime agricultural land, and coastal zones): There are not expected to be changes in land use caused by the proposed project.
- C. Changes in air or water quality stemming from development including traffic impacts: Air quality may be impacted in the short term due to construction activity, but the proposed project will not have an impact on long term air quality. Water quality will be improved by the removal and replacement of lead service lines.
- D. Changes to the natural areas and sensitive species or ecosystems due to secondary growth: There are no expected changes to natural areas and sensitive species or ecosystems caused by the proposed project.
- E. Changes to aesthetic aspects of the community: There will be no aesthetic changes caused by the proposed project.
- F. Resource Consumption: Resource consumption is not expected to change over the useful life of the proposed project.

### **4.3 Cumulative**

There are minimal cumulative impacts expected as a result of the proposed project. This project will not include significant discharges to local waters, cause unwanted development, or excessively overwhelm the City financially.

## **5 Mitigation**

While environmental impacts to endangered and threatened species are not expected, they will be further mitigated by adherence to conservation measures listed in the USFWS Concurrence Letter included in Appendix C which include the use of wildlife-friendly erosion control products and restricting any tree trimming to between October 1 through April 14.

Impacts to historical and cultural resources are not expected. The City will complete a Section 106 Consultation with the Michigan SHPO which includes evaluation of the project area by a qualified architectural historian and archaeologist. The THPO for the project area has also been notified of the proposed project and has been provided the opportunity to comment on any known cultural impact the proposed project may have. Letters sent to members of the THPO have been included in Appendix C. Any responses received will also be included in the Appendix.

The main negative impacts are related to the construction work required for the proposed project. These can be minimized through efficient and economically effective design and construction, air pollution control equipment, and noise control. Air pollution can be minimized through proper maintenance such as muffling of equipment. Additionally, calcium chloride and water can be used for dust control. Designated work hours, mufflers, and prohibiting work on weekends and holidays can help to limit noise pollution. The proposed project will require labor, time, materials, money, and energy for construction that are irreversible.

## **6 Public Participation**

### **6.1 Public Meeting**

The draft plan was submitted on April 11, 2025 to City Staff for their review. A physical (hard) copy of the Project Plan is available for review at the City of Battle Creek's Department of Public Works located at 150 S Kendall Street, Battle Creek, Michigan 49037 and a link to download the digital version will be advertised.

### **6.2 Public Meeting Advertisement**

The Public Hearing, scheduled for May 6, 2025 at 7:00 pm at City Commission Chambers, Room 301 in City Hall, 10 N Division Street, Battle Creek, Michigan 49014, was advertised by the City through their typical media release protocols on Monday, April 21, 2025. A copy of the press release as well as screenshots of the postings will be included in Appendix E

### **6.3 Public Meeting Summary**

The summary of the Public Hearing will be included in Appendix E.

Comments Received and Answered: (Questions received during the Public Hearing will be addressed here.)

### **6.4 Adoption of the Project Plan**

Information regarding the adoption of the project plan (post public hearing) will be included here.

### MAPS

DRAFT - FOR REVIEW AND COMMENT

# Calhoun County Final Wetland Inventory

## Calhoun County Final Wetland Inventory

This Michigan Department of Environmental Quality (MDEQ) Wetland Inventory Map is intended to be used as one tool to assist in identifying wetlands and provides only potential and approximate location of wetlands and wetland conditions. The MDEQ produced this map from the following data obtained from other agencies or organizations:

1. The National Wetland Inventory (NWI) conducted by the United States Fish and Wildlife Service through interpretation of aerial photos and topographic data.
2. Land Cover as mapped by the Michigan Resource Inventory System (MIRIS), Michigan Department of Natural Resources, through interpretation of aerial photographs.
3. Soils as mapped by the United States Department of Agriculture, Natural Resource Conservation Service (NRCS).

This map is not intended to be used to determine the specific locations and jurisdictional boundaries of wetland areas subject to regulation under Part 303, Wetlands Protection, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended. Only an on-site evaluation performed by the MDEQ in accordance with Part 303 shall be used for jurisdictional determinations. A permit is required from the MDEQ to conduct certain activities in wetlands regulated under Part 303.

More information regarding this map, including how to obtain a copy can be accessed at [www.michigan.gov/deqwetlands](http://www.michigan.gov/deqwetlands).

### Legend

- Interstate Highways
- US Highways
- State Highways
- Railways
- Open Water
- Rivers
- Drains
- Wetlands as identified on NWI and MIRIS maps
- Soil areas which include wetland soils
- Wetlands as identified on NWI and MIRIS maps and soil areas which include wetland soils
- County Boundary

Areas shown as wetlands, wetland soils, or open water on the map are potential wetlands and deserve further investigation if wetlands are actually present. This map may not identify all potential wetlands in a county and may miss wetlands that are not actually present and may not show wetlands which are actually present. This map represents existing information that suggests the probability that a wetland may or may not exist in a given area and cannot be used to identify regulatory jurisdiction.

**DRAFT - FOR REVIEW AND COMMENT**

**Description of Map Units**

**Quaternary**

- Peat and Muck: Isolated, poorly drained depressions or floodplain of Kalamazoo River Valley. Age of material is Holocene. May be underlain by bedded sand and gravel or bedded silt and clay.
- Qp: Alluvium. Consists of bedded sand and gravel to bedded silt and clay. Age of surface sediment is Holocene.
- Qd: Material underlain by bedded sand, gravel, or bedded silt. May be overlie in places by bedded sand or gravel or bedded silt and clay. Small areas may not have diamictite present.
- Pits: Gravel and sand pits
- Diamictite: Non-stratified, compact, material (Qll) composed of clay to sand and with clasts ranging from pebble to boulder size. Sagnin Lobe. May be overlie in places by bedded sand and gravel or bedded silt and clay.
- Qds: Surface features formed by ridges oriented NE-SW (drumlin). Swales between drumlins may contain bedded sand and gravel or silt and clay.
- Ice-Marginal Position: Ridge or upland associated with ice-marginal position. High-relief hummocky topography.
- Qds2: Diamictite Over Sandstone Bedrock: Non-stratified, compact, material (Qll) composed of clay to sand matrix with clasts ranging from pebble to boulder size. Sagnin Lobe. Small areas may not have diamictite present.
- Esker: Linear to gently sloping ridge composed of sand and gravel. Deposited in tunnel of base of ice or in ice-walled channel during deglaciation.
- Qe: Fan: Outwash deposited in sloping fan-shaped landform emanating from ice-marginal position or portal of tunnel valley. Characteristics similar to Qs1.
- Qf: Kame: Conical hill underlain by bedded sand and gravel. May also contain diamictite and silt and clay.
- Qk: Mapped areas of Qk are located near former ice margin at portal of tunnel valley.
- Ice-walled Lake Plain: Flat-topped hill within area interpreted as marginal ice stagnation deposit. Surficial deposits may consist of sand and gravel or bedded silt and clay. Several features contain tundra plant fragments and invertebrate fossils.
- Qs1: Glaciolacustrine Deposits: Depression on ice-marginal deposits underlain by bedded sand and silt. May contain bedded silt and clay at depth. May have initially developed on debris covered, stagnant ice.
- Qs2: Outwash: Bedded sand and gravel with unidirectional, kettles and collapse features. May contain small areas of Qs1. Transitioned to Cal along rivers. May also contain slopewash/coluvium at base of steep slopes.
- Qf: Terrace Deposit: Flat to gently sloping surface adjacent to Kalamazoo River, Rice Creek, St. Joseph River, and Coldwater River. High-angle terrace along a particular reach of the Kalamazoo River. Underlain by bedded sand and gravel of Pliocene age. Underlain by bedded sand and gravel of Pleistocene age.
- Q11: Terrace Deposit: Flat to gently sloping surface adjacent to Kalamazoo River, Rice Creek, St. Joseph River, and Coldwater River. Underlain by bedded sand and gravel of Pliocene age. Lower elevation than Q12.
- Q12: Terrace Deposit: Flat to gently sloping surface adjacent to Kalamazoo River, Rice Creek, St. Joseph River, and Coldwater River. Underlain by bedded sand and gravel of Pleistocene age. Lower elevation than Q12.
- Pennsylvanian**
- Pp: Parma Sandstone: Sandstone bedrock outcrop and thin drift areas. Fine-medium grained sandstone.
- Mississippi
- Mms: Marshall Sandstone: Bedrock outcrop and thin drift. Fine-medium grained sandstone.

Wilson MI 49896

Subject: Notice and Opportunity to Comment  
City of Battle Creek  
Drinking Water State Revolving Fund Project Plan  
Water System Lead Service Line Removals

Dear Ms. Meshigaud and Mr. Schuster:

Jones & Henry Engineers, Ltd., working on behalf of the City of Battle Creek, is preparing an application to fund improvements to the City of Battle Creek's drinking water system. This work is proposed for funding through the Michigan Department of Environment, Great Lakes, and Energy (EGLE), Drinking Water State Revolving Fund, in Fiscal Year 2026.

The proposed work consists of the removal and replacement of lead service lines in the system as required by Michigan's Lead and Copper Rule. These replacements will occur over several years and are expected to cover thousands of individual residential parcels across the City. Ground disturbance, at each site, is expected to be 5 feet deep, 10 feet wide, and the length from the center of the road to the front of each house.

The project will be located in Calhoun County in the following locations:

- Section 01, Township 2 South, Range 8 West
- Section 02, Township 2 South, Range 8 West
- Section 06, Township 2 South, Range 7 West
- Section 07, Township 2 South, Range 7 West
- Section 08, Township 2 South, Range 7 West
- Section 11, Township 2 South, Range 8 West
- Section 12, Township 2 South, Range 8 West
- Section 13, Township 2 South, Range 8 West
- Section 14, Township 2 South, Range 8 West
- Section 15, Township 2 South, Range 8 West
- Section 25, Township 1 South, Range 8 West
- Section 27, Township 1 South, Range 8 West
- Section 28, Township 1 South, Range 8 West
- Section 33, Township 1 South, Range 8 West
- Section 34, Township 1 South, Range 8 West
- Section 35, Township 1 South, Range 8 West
- Section 36, Township 1 South, Range 8 West

Re: Battle Creek Drinking Water System Improvements Project

Dear Mr. Davenport,

The Match-E-Be-Nash-She-Wish Band of Pottawatomi Indians' Tribal Historic Preservation Office has received the historic properties scoping request for comments regarding a proposed removal and replacement of lead service lines in Battle Creek, Calhoun County, Michigan. At present, we are not providing any additional comments. We have not identified any information concerning the presence of any cultural resources significant to the Match-E-Be-Nash-She-Wish Band of Pottawatomi Indians within the Area of Potential Effect (APE). This is not to say that such a site may not exist, just that this office does not have any available information for the area(s) at this point in time.

This office will be available to assist you in the future or during the course of this project if there is an unanticipated encounter with human remains, funerary objects, and artifacts. The subsequent identification of additional historic properties affected by the undertaking will require reinitiating Section 106 consultation related to all ongoing and proposed project work and the handling of "discoveries" per the National Historic Preservation Act (NHPA) implementing regulations, 36 CFR Part 800, and, as applicable, the Native American Graves and Repatriation Act (NAGPRA) and its implementing regulations, 43 CFR Part 10. In the event of an encounter with unanticipated human remains, funerary objects, and artifacts we request to be notified within 72 hours. At that time, the Tribe will determine if further consultation is necessary.

Please contact our office with any further questions or requests at 269-397-1780 or [Section106@gltnsn.gov](mailto:Section106@gltnsn.gov). Also, keep in mind that there may be other Tribal Nations that may have an interest or knowledge of cultural resources within the APE that we may not know about. We thank you for including the Match-E-Be-Nash-She-Wish Band of Pottawatomi Indians in your consultation efforts and planning processes.

Sincerely,

*Lakota Hobia*

City of Battle Creek  
Drinking Water State Revolving Fund Project Plan  
Water System Lead Service Line Removals

Dear Ms. Tenbrink, Ms. Zapata, and Mr. Taylor:

Jones & Henry Engineers, Ltd., working on behalf of the City of Battle Creek, is preparing an application to fund improvements to the City of Battle Creek's drinking water system. This work is proposed for funding through the Michigan Department of Environment, Great Lakes, and Energy (EGLE), Drinking Water State Revolving Fund, in Fiscal Year 2026.

The proposed work consists of the removal and replacement of lead service lines in the system as required by Michigan's Lead and Copper Rule. These replacements will occur over several years and are expected to cover thousands of individual residential parcels across the City. Ground disturbance, at each site, is expected to be 5 feet deep, 10 feet wide, and the length from the center of the road to the front of each house.

The project will be located in Calhoun County in the following locations:

- Section 01, Township 2 South, Range 8 West
- Section 02, Township 2 South, Range 8 West
- Section 06, Township 2 South, Range 7 West
- Section 07, Township 2 South, Range 7 West
- Section 08, Township 2 South, Range 7 West
- Section 11, Township 2 South, Range 8 West
- Section 12, Township 2 South, Range 8 West

Project Code: 2025-0068638

Project Name: City of Battle Creek DWSRF FY 26 - Lead Service Line Replacements

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

### Official Species List

The attached species list identifies any Federally threatened, endangered, proposed and candidate species that may occur within the boundary of your proposed project or may be affected by your proposed project. The list also includes designated critical habitat if present within your proposed project area or affected by your project. This list is provided to you as the initial step of the consultation process required under section 7(c) of the Endangered Species Act, also referred to as Section 7 Consultation.

Under 50 CFR 402.12(e) (the regulations that implement section 7 of the Endangered Species Act), the accuracy of this species list should be verified after 90 days. You may verify the list by visiting the IPaC website (<https://ipac.ecosphere.fws.gov/>) at regular intervals during project planning and implementation. To update an Official Species List in IPaC: from the My Projects page, find the project, expand the row, and click Project Home. In the What's Next box on the Project Home page, there is a Request Updated List button to update your species list. Be sure to select an "official" species list for all projects.

### Consultation requirements and next steps

Section 7 of the Endangered Species Act of 1973 requires that actions authorized, funded, or carried out by Federal agencies not jeopardize Federally threatened or endangered species or adversely modify designated critical habitat. To fulfill this mandate, Federal agencies (or their designated non-Federal representative) must consult with the Fish and Wildlife Service if they determine their project may affect listed species or critical habitat.

There are two approaches to evaluating the effects of a project on listed species.

Approach 1. Use the All-species Michigan determination key in IPaC. This tool can assist you in making determinations for listed species for some projects. In many cases, the determination key

will provide an automated concurrence that completes all or significant parts of the consultation process. Therefore, we strongly recommend screening your project with the **All-Species Michigan Determination Key (Dkey)**. For additional information on using IPaC and available Determination Keys, visit <https://www.fws.gov/media/mifo-ipac-instructions> (and click on the attachment), or for a video overview, please visit: <https://www.youtube.com/watch?v=FfcerNCiL0I>. Please carefully review your Dkey output letter to determine whether additional steps are needed to complete the consultation process.

Approach 2. Evaluate the effects to listed species on your own without utilizing a determination key. Once you obtain your official species list, you are not required to continue in IPaC, although in most cases using a determination key should expedite your review. If the project is a Federal action, you should review our section 7 step-by-step instructions before making your determinations: <https://www.fws.gov/office/midwest-region-headquarters/midwest-section-7-technical-assistance>. If you evaluate the details of your project and conclude “no effect,” document your findings, and your listed species review is complete; you do not need our concurrence on “no effect” determinations. If you cannot conclude “no effect,” you should coordinate/consult with the Michigan Ecological Services Field Office. The preferred method for submitting your project description and effects determination (if concurrence is needed) is electronically to [EastLansing@fws.gov](mailto:EastLansing@fws.gov). Please include a copy of this official species list with your request.

For all **wind energy projects**, please contact this field office directly for assistance, even if no Federally listed plants, animals or critical habitat are present within your proposed project area or may be affected by your proposed project.

### **Migratory Birds**

Please see the “Migratory Birds” section below for important information regarding incorporating migratory birds into your project planning. Our Migratory Bird Program has developed recommendations, best practices, and other tools to help project proponents voluntarily reduce impacts to birds and their habitats. The Bald and Golden Eagle Protection Act prohibits the take and disturbance of eagles without a permit. If your project is near an eagle nest or winter roost area, see our Eagle Permits website at <https://www.fws.gov/program/eagle-management> to help you avoid impacting eagles or determine if a permit may be necessary.

Executive Order 13186: *Responsibilities of Federal Agencies to Protect Migratory Birds*, obligates all Federal agencies that engage in or authorize activities that might affect migratory birds, to minimize those effects and encourage conservation measures that will improve bird populations. Executive Order 13186 provides for the protection of both migratory birds and migratory bird habitat. For information regarding the implementation of Executive Order 13186, please visit <https://www.fws.gov/partner/council-conservation-migratory-birds>.

We appreciate your consideration of threatened and endangered species during your project

planning. Please include a copy of this letter with any request for consultation or correspondence about your project that you submit to our office.

## OFFICIAL SPECIES LIST

This list is provided pursuant to Section 7 of the Endangered Species Act, and fulfills the requirement for Federal agencies to "request of the Secretary of the Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action".

This species list is provided by:

**Michigan Ecological Services Field Office**

(517) 351-2555

## PROJECT SUMMARY

Project Code: 2025-0068638  
Project Name: City of Battle Creek DWSRF FY 26 - Lead Service Line Replacements  
Project Type: Water Supply Pipeline - Maintenance/Modification - Below Ground  
Project Description: The proposed work consists of the removal and replacement of lead service lines in the City of Battle Creek's water system as required by Michigan's Lead and Copper Rule. These replacements will occur over several years and are expected to cover thousands of individual residential parcels across the City. Ground disturbance, at each site, is expected to be 5 feet deep, 10 feet wide, and the length from the center of the road to the front of each house.

Project Location:

The approximate location of the project can be viewed in Google Maps: <https://www.google.com/maps/@42.32827845,-85.19503105200712,14z>

Counties: Calhoun County, Michigan

## ENDANGERED SPECIES ACT SPECIES

There is a total of 6 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species. Note that 1 of these species should be considered only under certain conditions.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries<sup>1</sup>, as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

---

## MAMMALS

NAME	STATUS
Indiana Bat <i>Myotis sodalis</i>	Endangered
<p>There is <b>final</b> critical habitat for this species. Your location does not overlap the critical habitat.</p> <p>Species profile: <a href="https://ecos.fws.gov/ecp/species/5949">https://ecos.fws.gov/ecp/species/5949</a></p> <p>General project design guidelines:</p> <p><a href="https://ipac.ecosphere.fws.gov/project/KCFGBJ4J7RGDZNWI6GDNW4AVWU/documents/generated/6982.pdf">https://ipac.ecosphere.fws.gov/project/KCFGBJ4J7RGDZNWI6GDNW4AVWU/documents/generated/6982.pdf</a></p>	
Tricolored Bat <i>Perimyotis subflavus</i>	Proposed
<p>No critical habitat has been designated for this species.</p> <p>Species profile: <a href="https://ecos.fws.gov/ecp/species/10515">https://ecos.fws.gov/ecp/species/10515</a></p>	Endangered

## BIRDS

NAME	STATUS
Whooping Crane <i>Grus americana</i>	Experimental Population, Non-Essential
<p>Population: U.S.A. (AL, AR, CO, FL, GA, ID, IL, IN, IA, KY, LA, MI, MN, MS, MO, NC, NM, OH, SC, TN, UT, VA, WI, WV, western half of WY)</p> <p>No critical habitat has been designated for this species.</p> <p>Species profile: <a href="https://ecos.fws.gov/ecp/species/758">https://ecos.fws.gov/ecp/species/758</a></p>	

## REPTILES

NAME	STATUS
Copperbelly Water Snake <i>Nerodia erythrogaster neglecta</i>	Threatened
<p>Population: Indiana north of 40 degrees north latitude, Michigan, Ohio</p> <p>No critical habitat has been designated for this species.</p> <p>Species profile: <a href="https://ecos.fws.gov/ecp/species/7253">https://ecos.fws.gov/ecp/species/7253</a></p>	
Eastern Massasauga (=rattlesnake) <i>Sistrurus catenatus</i>	Threatened
<p>No critical habitat has been designated for this species.</p> <p>This species only needs to be considered under the following conditions:</p> <ul style="list-style-type: none"> <li>For all Projects: Project is within EMR Range</li> </ul> <p>Species profile: <a href="https://ecos.fws.gov/ecp/species/2202">https://ecos.fws.gov/ecp/species/2202</a></p> <p>General project design guidelines:</p> <p><a href="https://ipac.ecosphere.fws.gov/project/KCFGBJ4J7RGDZNWI6GDNW4AVWU/documents/generated/5280.pdf">https://ipac.ecosphere.fws.gov/project/KCFGBJ4J7RGDZNWI6GDNW4AVWU/documents/generated/5280.pdf</a></p>	

## INSECTS

NAME	STATUS
Monarch Butterfly <i>Danaus plexippus</i>	Proposed Threatened
<p>There is <b>proposed</b> critical habitat for this species. Your location does not overlap the critical habitat.</p> <p>Species profile: <a href="https://ecos.fws.gov/ecp/species/9743">https://ecos.fws.gov/ecp/species/9743</a></p>	

## CRITICAL HABITATS

THERE ARE NO CRITICAL HABITATS WITHIN YOUR PROJECT AREA UNDER THIS OFFICE'S JURISDICTION.

YOU ARE STILL REQUIRED TO DETERMINE IF YOUR PROJECT(S) MAY HAVE EFFECTS ON ALL ABOVE LISTED SPECIES.

## USFWS NATIONAL WILDLIFE REFUGE LANDS AND FISH HATCHERIES

Any activity proposed on lands managed by the [National Wildlife Refuge](#) system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

THERE ARE NO REFUGE LANDS OR FISH HATCHERIES WITHIN YOUR PROJECT AREA.

## BALD & GOLDEN EAGLES

Bald and Golden Eagles are protected under the Bald and Golden Eagle Protection Act <sup>2</sup> and the Migratory Bird Treaty Act (MBTA) <sup>1</sup>. Any person or organization who plans or conducts activities that may result in impacts to Bald or Golden Eagles, or their habitats, should follow appropriate regulations and consider implementing appropriate avoidance and minimization measures, as described in the various links on this page.

---

1. The [Bald and Golden Eagle Protection Act](#) of 1940.
2. The [Migratory Birds Treaty Act](#) of 1918.
3. 50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)

There are Bald Eagles and/or Golden Eagles in your [project](#) area.

### Measures for Proactively Minimizing Eagle Impacts

For information on how to best avoid and minimize disturbance to nesting bald eagles, please review the [National Bald Eagle Management Guidelines](#). You may employ the timing and activity-specific distance recommendations in this document when designing your project/activity to avoid and minimize eagle impacts. For bald eagle information specific to Alaska, please refer to [Bald Eagle Nesting and Sensitivity to Human Activity](#).

The FWS does not currently have guidelines for avoiding and minimizing disturbance to nesting Golden Eagles. For site-specific recommendations regarding nesting Golden Eagles, please consult with the appropriate Regional [Migratory Bird Office](#) or [Ecological Services Field Office](#).

If disturbance or take of eagles cannot be avoided, an [incidental take permit](#) may be available to authorize any take that results from, but is not the purpose of, an otherwise lawful activity. For assistance making this determination for Bald Eagles, visit the [Do I Need A Permit Tool](#). For

assistance making this determination for golden eagles, please consult with the appropriate Regional [Migratory Bird Office](#) or [Ecological Services Field Office](#).

### Ensure Your Eagle List is Accurate and Complete

If your project area is in a poorly surveyed area in IPaC, your list may not be complete and you may need to rely on other resources to determine what species may be present (e.g. your local FWS field office, state surveys, your own surveys). Please review the [Supplemental Information on Migratory Birds and Eagles](#), to help you properly interpret the report for your specified location, including determining if there is sufficient data to ensure your list is accurate.

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to bald or golden eagles on your list, see the "Probability of Presence Summary" below to see when these bald or golden eagles are most likely to be present and breeding in your project area.

NAME	BREEDING SEASON
Bald Eagle <i>Haliaeetus leucocephalus</i> This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. <a href="https://ecos.fws.gov/ecp/species/1626">https://ecos.fws.gov/ecp/species/1626</a>	Breeds Dec 1 to Aug 31
Golden Eagle <i>Aquila chrysaetos</i> This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. <a href="https://ecos.fws.gov/ecp/species/1680">https://ecos.fws.gov/ecp/species/1680</a>	Breeds elsewhere

## PROBABILITY OF PRESENCE SUMMARY

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read ["Supplemental Information on Migratory Birds and Eagles"](#), specifically the FAQ section titled "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

### Probability of Presence (■)

Green bars; the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during that week of the year.

### Breeding Season (■)

Yellow bars; liberal estimate of the timeframe inside which the bird breeds across its entire range.

### Survey Effort (|)

Vertical black lines; the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps.

**No Data (-)**

A week is marked as having no data if there were no survey events for that week.

■ probability of presence ■ breeding season | survey effort — no data

## MIGRATORY BIRDS

The Migratory Bird Treaty Act (MBTA) <sup>1</sup> prohibits the take (including killing, capturing, selling, trading, and transport) of protected migratory bird species without prior authorization by the Department of Interior U.S. Fish and Wildlife Service (Service). The incidental take of migratory birds is the injury or death of birds that results from, but is not the purpose, of an activity. The Service interprets the MBTA to prohibit incidental take.

1. The [Migratory Birds Treaty Act of 1918](#).
2. The [Bald and Golden Eagle Protection Act](#) of 1940.
3. 50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, see the "Probability of Presence Summary" below to see when these birds are most likely to be present and breeding in your project area.

NAME	BREEDING SEASON
Bald Eagle <i>Haliaeetus leucocephalus</i> This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. <a href="https://ecos.fws.gov/ecp/species/1626">https://ecos.fws.gov/ecp/species/1626</a>	Breeds Dec 1 to Aug 31
Black-billed Cuckoo <i>Coccyzus erythrophthalmus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. <a href="https://ecos.fws.gov/ecp/species/9399">https://ecos.fws.gov/ecp/species/9399</a>	Breeds May 15 to Oct 10
Bobolink <i>Dolichonyx oryzivorus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. <a href="https://ecos.fws.gov/ecp/species/9454">https://ecos.fws.gov/ecp/species/9454</a>	Breeds May 20 to Jul 31

03/14/2025 14:52:18 UTC

Project code: 2025-0068638

Project Name: City of Battle Creek DWSRF FY 26 - Lead Service Line Replacements

Subject: Verification letter for the project named 'City of Battle Creek DWSRF FY 26 - Lead Service Line Replacements' for specified threatened and endangered species that may occur in your proposed project location consistent with the Michigan Endangered Species Determination Key (Michigan DKey)

Dear Alexandria Booker-Dyser:

The U.S. Fish and Wildlife Service (Service) received on **March 14, 2025** your effect determination(s) for the 'City of Battle Creek DWSRF FY 26 - Lead Service Line Replacements' (the Action) using the Michigan DKey within the Information for Planning and Consultation (IPaC) system. The Service developed this system in accordance with the Endangered Species Act of 1973 (ESA) (87 Stat.884, as amended; 16 U.S.C. 1531 et seq.).

Based on your answers and the assistance of the Service's Michigan DKey, you made the following effect determination(s) for the proposed Action:

Species	Listing Status	Determination
Copperbelly Water Snake ( <i>Nerodia erythrogaster neglecta</i> )	Threatened	No effect
Eastern Massasauga (=rattlesnake) ( <i>Sistrurus catenatus</i> )	Threatened	NLAA
Indiana Bat ( <i>Myotis sodalis</i> )	Endangered	NLAA
Monarch Butterfly ( <i>Danaus plexippus</i> )	Proposed Threatened	No effect
Tricolored Bat ( <i>Perimyotis subflavus</i> )	Proposed Endangered	No effect
Whooping Crane ( <i>Grus americana</i> )	Experimental Population, Non-Essential	No effect

The Service will notify you within 30 calendar days if we determine that this proposed Action does not meet the criteria for a "may affect, not likely to adversely affect" (NLAA) determination

for Federally listed species in Michigan. If we do not notify you within that timeframe, you may proceed with the Action under the terms of the NLAA concurrence provided here. This verification period allows the Michigan Ecological Services Field Office to apply local knowledge to evaluation of the Action, as we may identify a small subset of actions having impacts that were unanticipated. In such instances, the Michigan Ecological Services Field Office may request additional information to verify the effects determination reached through the Michigan DKey.

Your agency has met consultation requirements by informing the Service of your “No Effect” determination(s). No consultation is required for species that you determined will not be affected by the Action.

Please provide sufficient project details on your project homepage in IPaC (Define Project, Project Description) to support your conclusions and the Service’s 30-day review period. Failure to disclose important aspects of your project that would influence the outcome of your effects determinations may negate your determinations and invalidate this letter. If you have site-specific information that leads you to believe a different determination is more appropriate for your project than what the Dkey concludes, you can and should proceed based on the best available information.

The Service recommends that you contact the Service or re-evaluate the project in IPaC if: 1) the scope or location of the proposed Action is changed; 2) new information reveals that the action may affect listed species or designated critical habitat in a manner or to an extent not previously considered; 3) the Action is modified in a manner that causes effects to listed species or designated critical habitat; or 4) a new species is listed or critical habitat designated. If any of the above conditions occurs, additional consultation with the Service should take place before project changes are final or resources committed.

For non-Federal representatives: Please note that when a project requires consultation under section 7 of the Act, the Service must consult directly with the Federal action agency unless that agency formally designates a non-Federal representative (50 CFR 402.08). Non-Federal representatives may prepare analyses or conduct informal consultations; however, the ultimate responsibility for section 7 compliance under the Act remains with the Federal agency. If the Federal agency concurs with your determination, the project as proposed has completed section 7 consultation. All documents and supporting correspondence should be provided to the Federal agency for their records.

#### **Bats of Conservation Concern:**

Implementing protective measures for bats, including both federally listed and non-listed species, indirectly helps to protect Michigan’s agriculture and forests. Bats are significant predators of nocturnal insects, including many crop and forest pests. For example, Whitaker (1995) estimated that a single colony of 150 big brown bats (*Eptesicus fuscus*) would eat nearly 1.3 million pest insects each year. Boyles et al. (2011) noted the “loss of bats in North America could lead to agricultural losses estimated at more than \$3.7 billion/year, and Maine and Boyles (2015) estimated that the suppression of herbivory by insectivorous bats is worth >1 billion USD globally on corn alone. In captive trials, northern long-eared bats were found to significantly reduce the egg-laying activity of mosquitoes, suggesting bats may also play an important role in

controlling insect-borne disease (Reiskind and Wund 2009). Mosquitoes have also been found to be a consistent component of the diet of Indiana bats and are eaten most heavily during pregnancy (6.6%; Kurta and Whitaker 1998). Taking proactive steps to help protect bats may be very valuable to agricultural and forest product yields and pest management costs in and around a project area. Such conservation measures include limiting tree clearing during the bat active season (varies by location) and/or the non-volant period (June through July), when young bats are unable to fly, and minimizing the extent of impacts to forests, wetlands, and riparian habitats.

### **Bald and Golden Eagles:**

Bald eagles, golden eagles, and their nests are protected under the Bald and Golden Eagle Protection Act (54 Stat. 250, as amended, 16 U.S.C. 668a-d) (Eagle Act). The Eagle Act prohibits, except when authorized by an Eagle Act permit, the “taking” of bald and golden eagles and defines “take” as “pursue, shoot, shoot at, poison, wound, kill, capture, trap, collect, molest or disturb.” The Eagle Act’s implementing regulations define disturb as “...to agitate or bother a bald or golden eagle to a degree that causes, or is likely to cause, based on the best scientific information available, (1) injury to an eagle, (2) a decrease in its productivity, by substantially interfering with normal breeding, feeding, or sheltering behavior, or (3) nest abandonment, by substantially interfering with normal breeding, feeding, or sheltering behavior.”

If the Action may impact bald or golden eagles, additional coordination with the Service under the Eagle Act may be required. For more information on eagles and conducting activities in the vicinity of an eagle nest, please visit <https://www.fws.gov/library/collections/all-about-eagles>. In addition, the Service developed the National Bald Eagle Management Guidelines (May 2007) in order to assist landowners in avoiding the disturbance of bald eagles. The full Guidelines are available at <https://www.fws.gov/media/national-bald-eagle-management-guidelines-0>.

If you have further questions regarding potential impacts to eagles, please contact Chris Mensing, [Chris\\_Mensing@fws.gov](mailto:Chris_Mensing@fws.gov) or 517-351-2555.

### **Monarch butterfly and other pollinators**

In December 2020, after an extensive status assessment of the monarch butterfly, we determined that listing the monarch under the Endangered Species Act is warranted but precluded by higher priority actions to amend the Lists of Endangered and Threatened Wildlife and Plants. Therefore, the Service added the monarch butterfly to the candidate list. The Service will review its status each year until we are able to begin developing a proposal to list the monarch.

The Endangered Species Act does not establish protections or consultation requirements for candidate species. Some Federal and State agencies may have policy requirements to consider candidate species in planning. We encourage implementing measures that will remove or reduce threats to these species and possibly make listing unnecessary.

For all projects, we recommend the following best management practices (BMPs) to benefit monarch and other pollinators.

#### Monarch and Pollinator BMP Recommendations

Consider monarch and other pollinators in your project planning when possible. Many pollinators are declining, including species that pollinate key agricultural crops and help maintain

natural plant communities. Planting a diverse group of native plant species will help support the nutritional needs of Michigan's pollinators. We recommend a mix of flowering trees, shrubs, and herbaceous plants so that something is always blooming and pollen is available during the active periods of the pollinators, roughly early spring through fall (mid-March to mid-October). To benefit a wide variety of pollinators, choose a wide range of flowers with diverse colors, heights, structure, and flower shape. It is important to provide host plants for any known butterfly species at your site, including native milkweed for Monarch butterfly. Incorporating a water source (e.g., ephemeral pool or low area) and basking areas (rocks or bare ground) will provide additional resources for pollinators.

Many pollinators need a safe place to build their nests and overwinter. During spring and summer, leave some areas unmowed or minimize the impacts from mowing (e.g., decrease frequency, increase vegetation height). In fall, leave areas unraked and leave plant stems standing. Leave patches of bare soil for ground nesting pollinators.

Avoid or limit pesticide use. Pesticides can kill more than the target pest. Some pesticide residues can kill pollinators for several days after the pesticide is applied. Pesticides can also kill natural predators, which can lead to even worse pest problems.

Planting native wildflowers can also reduce the need to mow and water, improve bank stabilization by reducing erosion, and improve groundwater recharge and water quality.

#### Resources:

<https://www.fws.gov/initiative/monarchs>  
<https://www.fws.gov/library/collections/pollinators>

#### **Wetland impacts:**

Section 404 of the Clean Water Act of 1977 (CWA) regulates the discharge of dredged or fill material into waters (including wetlands) of the United States. Regulations require that activities permitted under the CWA (including wetland permits issued by the Michigan Department of Environment, Great Lakes, and Energy (EGLE)) not jeopardize the continued existence of species listed as endangered or threatened. Permits issued by the U.S. Army Corps of Engineers must also consider effects to listed species pursuant to section 7 of the Endangered Species Act. The Service provides comments to the agencies that may include permit conditions to help avoid or minimize impacts to wildlife resources including listed species. For this project, we consider the conservation measures you agreed to in the determination key and/or as part of your proposed action to be non-discretionary. If you apply for a wetland permit, these conservation measures should be explicitly incorporated as permit conditions. Include a copy of this letter in your wetland permit application to streamline the threatened and endangered species review process.

#### **Bat References**

Boyles, J.G., P.M. Cryan, G.F. McCracken, T.H. Kunz. 2011. Economic Importance of Bats in Agriculture. *Science* 332(1):41-42.

Kurta, A. and J.O. Whitaker. 1998. Diet of the Endangered Indiana Bat (*Myotis sodalis*) on the Northern Edge of Its Range. *The American Midland Naturalist* 140(2):280-286.

Reiskind, M.H. and M.A. Wund. 2009. Experimental assessment of the impacts of northern long-eared bats on ovipositing Culex (Diptera: Culicidae) mosquitoes. *Journal of Medical Entomology*

46(5):1037-1044.

Whitaker, Jr., J.O. 1995. Food of the big brown bat *Eptesicus fuscus* from maternity colonies in Indiana and Illinois. *American Midland Naturalist* 134(2):346-360.

**Summary of conservation measures for your project** You agree to the following conservation measures to avoid adverse effects to listed species and our concurrence is only valid if the measures are fully implemented. These must be included as permit conditions if a permit is required and/or included in any contract language.

**Eastern massasauga:** Materials used for erosion control and site restoration must be wildlife-friendly. Do not use erosion control products containing plastic mesh netting or other similar material that could entangle eastern massasauga rattlesnake (EMR). Several products for soil erosion and control exist that do not contain plastic netting including net-less erosion control blankets (for example, made of excelsior), loose mulch, hydraulic mulch, soil binders, unreinforced silt fences, and straw bales. Others are made from natural fibers (such as jute) and loosely woven together in a manner that allows wildlife to wiggle free.

**Eastern massasauga:** To increase human safety and awareness of EMR, those implementing the project must first review the EMR factsheet (available at <https://www.fws.gov/media/eastern-massasauga-rattlesnake-fact-sheet>), and watch MDNR's "60-Second Snakes: The Eastern Massasauga Rattlesnake" video (available at [https://www.youtube.com/watch?v=-PFnXe\\_e02w](https://www.youtube.com/watch?v=-PFnXe_e02w)).

**Eastern massasauga:** During project implementation, report sightings of any federally listed species, including EMR, to the Service within 24 hours.

**Eastern massasauga:** The project will not result in permanent loss of more than one acre of wetland or conversion of more than 10 acres of EMR upland habitat (uplands associated with high quality wetland habitat) to other land uses.

**Listed bats:** The action will not include temporary or permanent lighting of roadway(s), facility(ies), and/or parking lot(s).

**Listed bats:** Any cutting/trimming of potential roost trees for Indiana bat (trees  $\geq$ 5 inches in diameter [at breast height] with cracks, crevices and/or exfoliating bark) will be limited to the inactive season for Indiana bat (October 1 through April 14). Prescribed fire and/or pesticide application will also occur during the inactive season where potential roost trees are present.

Tree cutting/trimming and/or prescribed burning will not clear  $\geq$ 10 contiguous acres of modeled forested habitat or fragment a connective corridor between 2 or more forest patches of at least 5 acres.

**Listed bats:** Tree cutting/trimming and/or prescribed burning will not clear  $\geq$ 10 contiguous acres of forest (including both modeled and unmodeled potential habitat) or fragment a connective corridor between 2 or more forest patches of at least 5 acres.

**Action Description**

You provided to IPaC the following name and description for the subject Action.

**1. Name**

City of Battle Creek DWSRF FY 26 - Lead Service Line Replacements

**2. Description**

The following description was provided for the project 'City of Battle Creek DWSRF FY 26 - Lead Service Line Replacements':

The proposed work consists of the removal and replacement of lead service lines in the City of Battle Creek's water system as required by Michigan's Lead and Copper Rule. These replacements will occur over several years and are expected to cover thousands of individual residential parcels across the City. Ground disturbance, at each site, is expected to be 5 feet deep, 10 feet wide, and the length from the center of the road to the front of each house.

The approximate location of the project can be viewed in Google Maps: <https://www.google.com/maps/@42.32827845,-85.19503105200712,14z>

## QUALIFICATION INTERVIEW

1. Are there any possible effects to any listed species or to designated critical habitat from your project or effects from any other actions or projects subsequently made possible by your project?

Select "Yes" even if the expected effects to the species or critical habitat are expected to be 1) extremely unlikely (discountable), 2) can't meaningfully be measured, detected, or evaluated (insignificant), or 3) wholly beneficial.

Select "No" to confirm that the project details and supporting information allow you to conclude that listed species and their habitats will not be exposed to any effects (including discountable, insignificant, or beneficial effects) and therefore, you have made a "no effect" determination for all species. If you are unsure, select YES to answer additional questions about your project.

Yes

2. This determination key is intended to assist the user in the evaluating the effects of their actions on Federally listed species in Michigan. It does not cover other prohibited activities under the Endangered Species Act (e.g., for wildlife: import/export, Interstate or foreign commerce, possession of illegally taken wildlife, purposeful take for scientific purposes or to enhance the survival of a species, etc.; for plants: import/export, reduce to possession, malicious destruction on Federal lands, commercial sale, etc.) or other statutes. Click yes to acknowledge that you must consider other prohibitions of the ESA or other statutes outside of this determination key.

Yes

3. Is the action the approval of a long-term (i.e., in effect greater than 10 years) permit, plan, or other action? (e.g., a new or re-issued hydropower license, a large-scale land management plan, or other kinds of documents that provide direction for projects or actions that may be conducted over a long term (>10 years) without the need for additional section 7 consultation).

No

4. Is the action being funded, authorized, or carried out by a Federal agency?

Yes

5. Does the action involve the installation or operation of wind turbines?

No

6. Are there at least 30 days prior to your action occurring? Endangered species consultation must be completed before taking any action that may have effects to listed species. The Service also needs 30 days to review projects before we can verify conclusions in some key output letters. For example, if you have already started some components of the project on the ground (e.g., removed vegetation) before completing this key, answer "no" to this question. The only exception is if you have a Michigan Field Office pre-approved emergence survey (i.e., if you have conducted pre-approved emergence surveys for listed bats before tree removal, you can still answer yes to this question).

Yes

7. Does the action involve constructing a new communications tower or modifying an existing communications tower?

No

8. Does the activity involve aerial or other large-scale application of any chemical (including insecticide, herbicide, etc.)?

No

9. Does your project include water withdrawal (ground or surface water) greater than 10,000 gallons/day?

No

10. Will your action permanently affect hydrology?

No

11. Will your action temporarily affect hydrology?

No

12. Will your project have any direct impacts to a stream or river (e.g., Horizontal Directional Drilling (HDD), hydrostatic testing, stream/road crossings, new storm-water outfall discharge, dams, other in-stream work, changes to water quality or hydrology, etc.)?

No

13. Does your project have the potential to indirectly impact the stream/river or the riparian zone (e.g., cut and fill, horizontal directional drilling, hydrostatic testing, construction, vegetation removal, discharge, changes to water quality or hydrology, etc.)?

No

14. Will your action disturb the ground or existing vegetation? This includes any off road vehicle access, soil compaction, digging, seismic survey, directional drilling, heavy equipment, grading, trenching, placement of fill, pesticide application, vegetation management (including removal or maintenance using equipment or chemicals), cultivation, development, etc.

Yes

15. Is the action a utility-scale solar development project?

**Note:** Solar projects are considered utility scale if they will be 1 megawatt or larger.

No

16. [Hidden semantic] Does the action intersect the MOBU AOI?

**Automatically answered**

Yes

17. Under the ESA, monarchs remain warranted but precluded by listing actions of higher priority. The monarch is a candidate for listing at this time. The Endangered Species Act does not establish protections or consultation requirements for candidate species. Some Federal and State agencies may have policy requirements to consider candidate species in planning. We encourage implementing measures that will remove or reduce threats to these species and possibly make listing unnecessary. If your project will have no effect on monarch butterflies (for example, if your project won't affect their habitat or individuals), then you can make a "no effect" determination for this project. Are you making a "no effect" determination for monarch?

Yes

18. [Hidden Semantic] Does the action intersect the Eastern massasauga rattlesnake area of influence?

**Automatically answered**

Yes

19. Does your action involve prescribed fire?

No

20. Will this action occur entirely in the Eastern massasauga rattlesnake inactive season (October 16 through April 14)?

No

21. Will this action occur entirely in the Eastern massasauga rattlesnake active season (April 15 through October 15)?

No

22. Will the action result in permanent loss of more than one acre of wetland or conversion of more than 10 acres of uplands of potential Eastern massasauga rattlesnake habitat (uplands associated with high quality wetland habitat) to other land uses?

No

23. Will you use [wildlife safe materials](#) for erosion control and site restoration and eliminate the use of erosion control products containing plastic mesh netting or other similar material that could ensnare Eastern massasauga rattlesnake?

Yes

24. Will you watch MDNR's "[60-Second Snakes: The Eastern Massasauga Rattlesnake \(EMR\)](#)" video, review the [EMR factsheet](#) or call 517-351-2555 to increase human safety and awareness of EMR?

Yes

25. Will all action personnel report any Eastern massasauga rattlesnake observations, or observation of any other listed threatened or endangered species, during action implementation to the Service within 24 hours?

Yes

26. [Hidden Semantic] Does the action area intersect the whooping crane (ex. Pop) area of influence?

**Automatically answered**

Yes

27. Have you determined that the action will have no effect on individuals within the whooping crane nonessential experimental population (NEP)?

Yes

28. [Hidden Semantic] Does the action area intersect copperbelly water snake area of influence?

**Automatically answered**

Yes

29. The project has the potential to affect federally listed bats. Does the action area contain any known or potential bat hibernacula (natural caves, abandoned mines, or underground quarries)?

No

30. Has a presence/absence bat survey or field-based habitat assessment following the Service's Range-wide [Indiana Bat and Northern Long-eared Bat Summer Survey Guidelines](#) been conducted within the action area?

No

31. Does the action involve removal/modification of a human structure (barn, house or other building) known to contain roosting bats?

No

32. Does the action include removal/modification of an existing bridge or culvert?

No

33. Does the action include temporary or permanent lighting of roadway(s), facility(ies), and/or parking lot(s)?

No

34. Does the action include one or more of the following: (1) tree cutting/trimming, (2) prescribed fire, (3) pesticide (including insecticide and/or rodenticide), and/or (4) herbicide/fungicide application?

Yes

35. Does the action include herbicide application?

No

36. Will the action clear >10 acres of contiguous forest (i.e., connected by 1,000 feet or less) or fragment a riparian or other connective forested corridor (e.g., tree line) between 2 or more forest patches of at least 5 acres? For more information, see [Appendix II](#).

No

37. Does the action area contain potential NLEB bat roost trees (trees  $\geq 3$  inches in diameter [at breast height] with cracks, crevices, cavities and/or exfoliating bark)? For more information, see [Appendix IV](#).

Yes

38. Does the action area contain potential Indiana bat roost trees (trees  $\geq 5$  inches in diameter [at breast height] with cracks, crevices and/or exfoliating bark)? For more information, see [Appendix III](#).

Yes

39. Does the action include emergency cutting/trimming of hazard trees in order to prevent imminent loss of human life and/or property?

No

40. [Semantic] Is any portion of the action area within 5 miles of a known bat hibernaculum?

**Automatically answered**

No

41. Your project intersected modeled bat habitat.

Will all tree cutting/trimming, prescribed fire, and/or insecticide/rodenticide application be restricted to the inactive (hibernation) season for listed bats (that is, conducted during October 1 through April 14)?

Select N/A if the project does not include at least one of these activities.

Yes

42. Will the action clear >10 acres of modeled bat habitat?

To determine whether it is >10 acres, you can download the shapefile or kmz here: [Indiana bat model](#). For more information on the development of the Indiana bat habitat suitability model, see [Appendix I](#).

No

43. [Hidden Semantic] Does the action area intersect the Indiana bat AOI?

**Automatically answered**

Yes

44. [Hidden semantic] Does the action intersect the Tricolored bat AOI/SLA/range?

**Automatically answered**

Yes

45. The tricolored bat was proposed for listing as endangered on September 13, 2022. In Michigan, the tricolored bat was rare pre-white nose syndrome (WNS) and is exceedingly rare post-WNS. The species has been observed in 12 Michigan counties to date, largely during the fall or winter. With very few exceptions, the species has not been observed in Michigan in the summer months, and no maternity colonies have been found. During winter, tricolored bats hibernate in caves, abandoned mines, and abandoned tunnels ranging from small to large in size. During spring, summer and fall months, they roost primarily among leaf clusters of live or recently dead deciduous/hardwood trees.

Are you making a no effect determination on this project for the tricolored bat?

Yes

**Re: Rare Species Review #5374 – DWSRF project planned for the City of Battle Creek, Calhoun County, MI**

Hello:

The location for the proposed project was checked against known localities for rare species and unique natural features, which are recorded in the Michigan Natural Features Inventory (MNFI) natural heritage database. This continuously updated database is a comprehensive source of existing data on Michigan's endangered, threatened, or otherwise significant plant and animal species, natural plant communities, and other natural features. Records in the database indicate that a qualified observer has documented the presence of special natural features. The absence of records in the database for a particular site may mean that the site has not been surveyed. The only way to obtain a definitive statement on the status of natural features is to have a competent biologist perform a complete field survey.

Under Act 451 of 1994, the Natural Resources and Environmental Protection Act, Part 365, Endangered Species Protection, "a person shall not take, possess, transport, ...fish, plants, and wildlife indigenous to the state and determined to be endangered or threatened," unless first receiving an Endangered Species Permit from the Michigan Department of Natural Resources (MDNR), Wildlife Division. Responsibility to protect endangered and threatened species is not limited to the lists below. Other species may be present that have not been recorded in the database.

**MSU EXTENSION**

**Michigan Natural Features Inventory**

PO Box 13036  
Lansing MI 48901

(517) 284-6200  
Fax (517) 373-9566

[mnfi.anr.msu.edu](http://mnfi.anr.msu.edu)

MSU is an affirmative-action, equal-opportunity employer.

Several at-risk species and/or natural communities have been documented within 1.5 miles of the project location and it is possible that adverse impacts will occur. This response reflects a desktop review of the database and MNFI cannot fully evaluate this project without visiting the area. MNFI offers several levels of [Rare Species Reviews](#), including field surveys which I would be happy to discuss with you.

Sincerely,

*Michael Sanders*

Michael Sanders  
Environmental Review Specialist/Zoologist  
Michigan Natural Features Inventory

**Comments for Rare Species Review #5374**

It is important to note that it is the applicant's responsibility to comply with both state and federal threatened and endangered species legislation. Therefore, if a state listed species occurs at a project site, and you think you need an endangered species permit, please contact Amy Bleisch at DNR-Wildlife Division, [DNR-StateTEPermit@michigan.gov](mailto:DNR-StateTEPermit@michigan.gov) and review details on the [MDNR's Threatened/Endangered Species](#) resource page. If a federally listed species is involved and, you think a permit is needed, please contact Jessica Pruden, U.S. Fish and Wildlife Service, East Lansing office, 517-351-8316, or [Jessica\\_Pруден@fws.gov](mailto:Jessica_Pруден@fws.gov).

**NOTE:** Special concern species and natural communities are not protected under endangered species legislation, but efforts should be taken to minimize any or all impacts. Please consult MNFI's [Rare Species pages](#) for additional information on Michigan's rare plants and animals.

**NOTE:** Several rare freshwater mussels have been documented throughout the project area. Freshwater mussels (*Unionida*) require a fish host to complete their life cycle. Eggs are fertilized and develop into larvae within the gills of the female mussel. These larvae, called glochidia, are released into the water and must attach to a suitable fish host to survive and transform into the adult mussel. As zebra mussel (*Dreissena polymorpha*) infestation has led to the extirpation of many native mussel communities, boat hulls and trailers, fishing gear and scuba equipment should be thoroughly cleaned before moving between waterbodies, to prevent the spread of zebra mussel larvae and adults.

**Stream Group Designations**

**NOTE:** Michigan rivers and streams have been grouped according to existing information of mussel distribution and individual species conservation status. The Mussel Protocol Stream Groups are designed to document the **potential** presence or absence of state or federally listed mussel species. The layer was created by modeling the habitat suitability for each mussel species and may not correspond directly with a documented location for a listed mussel. A segment may be predicted as suitable for a number of mussel species, so the stream group number was assigned to the most restrictive of the potential mussel species present.

**This stretch of the Kalamazoo River is designated a Group 2 mussel stream** which means that State threatened and endangered mussel species may occur here and that certain surveys and possibly relocation procedures apply. I encourage you to read the [Michigan Freshwater Mussel Survey Protocols and Relocation Procedures](#) publication if in-stream work and/or land clearing activities occur that result in streambed disturbance and erosion and sedimentation into the river.

The [Mussel Map Viewer](#) is an interactive tool to allow users to explore listed native mussels across the Michigan landscape. Watershed level species lists are available alongside the Mussel Protocol Stream Groups.

**DRAFT - FOR REVIEW AND COMMENT**

**Table 1: Occurrences of Threatened & Endangered Species within 1.5 miles of Project Site**

**Comments for Table 1**

**Peregrine falcon (*Falco peregrinus*)**

**Habitat**

Known to nest on/at Federal Center Building/Heritage Tower in downtown Ballet Creek. Peregrine falcons historically nested on cliff faces but they have been introduced in several Michigan cities and are faring quite well where they nest on many types of man-made structures and feed on the abundance of small city birds like Rock pigeons.

### **Management Recommendations**

Historically, Peregrine falcon populations plummeted because of the bioaccumulation of pesticides in their food chain. Recently, however, their numbers are increasing. They are tolerant of human activity but nest sites should not be disturbed during the early nesting season. Routine ROW maintenance should not affect them. Bridge or building maintenance that includes active nest sites must be scheduled outside of the breeding season, between October and February whenever possible.

For more information, see the [\*Falco peregrinus\*](#) species page on the MNFI website.

### **Slippershell (*Alasmidonta viridis*)**

#### **Habitat**

Known to occur in the Kalamazoo River. The slippershell typically occurs in creeks and headwaters of rivers in sand or gravel substrates. Occasionally, they occur in larger rivers and lakes and in mud substrates.

#### **Management Recommendations**

The slippershell requires clear, clean water and substrates for survival. Like other mussels, threats include: siltation, poor water quality, point and non-point source pollution, and alteration of natural flow regimes. Maintenance or establishment of vegetated riparian buffers can help protect mussel habitats from these threats. Additionally, zebra mussels and other exotic species are a major threat to all mussels. Hence, control and management of exotic species also help protect native mussel species. And as with all mussels, protection of their hosts habitat is also crucial.

For more information, see the [\*Alasmidonta viridis\*](#) species page on the MNFI website.

**Comments for Table 2**

**Elktoe (*Alasmidonta marginata*)**

**Habitat**

Known to occur in the Kalamazoo River. The Elktoe is found in small to large sized streams and small to medium rivers. It is a riffle species, preferring swifter currents over packed sand and gravel substrates. The Elktoe is typically only found in clean, clear water (Cummings and Mayer 1992).

### **Management Recommendations**

The elktoe needs clean, fast-flowing water to survive. Therefore, changes to its habitat, such as river impoundment, siltation and channel disturbances, including dredging, negatively affect this species. Pollution from point (industrial and residential discharge) and non-point (siltation, herbicide and surface run-off) sources is also a threat to mussels and should be limited and monitored to insure compliance with the Clean Water Act. Control of zebra mussels is critical to preserving native mussels. It is essential to protect not only the habitat of the elktoe, but also the white sucker, northern hog sucker, shorthead redhorse, rockbass and warmouth, as they serve as hosts for the glochidia.

For more information, see the [\*Alasmidonta marginata\*](#) species page on the MNFI website.

## **Codes to accompany tables**

### **State Protection Status Code Definitions**

E = Endangered

T = Threatened

SC = Special concern

### **Federal Protection Status Code Definitions**

LE = listed endangered

LT = listed threatened

LELT = partly listed endangered and partly listed threatened

PDL = proposed delist

E(S/A) = endangered based on similarities/appearance

PS = partial status (federally listed in only part of its range)

C = species being considered for federal status

### **Global Heritage Status Rank Definitions (G RANK)**

The priority assigned by [NatureServe](#)'s national office for data collection and protection based upon the element's status throughout its entire world-wide range. Criteria not based only on number of occurrences; other critical factors also apply. Note that ranks are frequently combined.

G1 = critically imperiled globally because of extreme rarity (5 or fewer occurrences range-wide or very few remaining individuals or acres) or because of some factor(s) making it especially vulnerable to extinction.

G2 = imperiled globally because of rarity (6 to 20 occurrences or few remaining individuals or acres) or because of some factor(s) making it very vulnerable to extinction throughout its range.

G3 = Either very rare and local throughout its range or found locally (even abundantly at some of its locations) in a restricted range (e.g. a single western state, a physiographic region in the East) or because of other factor(s) making it vulnerable to extinction throughout its range; in terms of occurrences, in the range of 21 to 100.

G4 = Apparently secure globally, though it may be quite rare in parts of its range, especially at the periphery.

G5 = Demonstrably secure globally, though it may be quite rare in parts of its range, especially at the periphery.

Q = Taxonomy uncertain

### **State Heritage Status Rank Definitions (S RANK)**

The priority assigned by the Michigan Natural Features Inventory for data collection and protection based upon the element's status within the state. Criteria not based only on number of occurrences; other critical factors also apply. Note that ranks are frequently combined.

S1 = Critically imperiled in the state because of extreme rarity (5 or fewer occurrences or very few remaining individuals or acres) or because of some factor(s) making it especially vulnerable to extirpation in the state.

S2 = Imperiled in state because of rarity (6 to 20 occurrences or few remaining individuals or acres) or because of some factor(s) making it very vulnerable to extirpation from the state.

S3 = Rare or uncommon in state (on the order of 21 to 100

occurrences). S4 = apparently secure in state, with many occurrences.

S5 = demonstrably secure in state and essentially ineradicable under present conditions.

SX = apparently extirpated from state.

### EO Rank Codes

Element Occurrence (EO) ranks refer to the viability or ecological integrity of the occurrence; they provide an assessment of the likelihood that if current conditions prevail the EO will persist for a defined period of time, typically 20-100 years.

A - Excellent estimated viability/ecological integrity  
A? - Possibly excellent estimated viability/ecological integrity  
AB - Excellent or good estimated viability/ecological integrity  
AC - Excellent, good, or fair estimated viability/ecological integrity  
B - Good estimated viability/ecological integrity  
B? - Possibly good estimated viability/ecological integrity  
BC - Good or fair estimated viability/ecological integrity  
BD - Good, fair, or poor estimated viability/ecological integrity  
C - Fair estimated viability/ecological integrity  
C? - Possibly fair estimated viability/ecological integrity  
CD - Fair or poor estimated viability/ecological integrity  
D - Poor estimated viability/ecological integrity  
D? - Possibly poor estimated viability/ecological integrity  
E - Verified extant (viability/ecological integrity not assessed)  
F - Failed to find  
F? - Possibly failed to find  
H - Historical  
H? - Possibly historical  
X - Extirpated  
X? - Possibly extirpated  
U - Unrankable  
NR - Not ranked

## DRAFT - FOR REVIEW AND COMMENT

### Section 7 Comments for Rare Species Review #5374

### DWSRF project planned for the City of Battle Creek, Calhoun County, MI

Alex Booker-Dysert

Jones and Henry Engineers, Inc.

4791 Campus Drive

Kalamazoo, MI 49008

April 9, 2025

#### **For projects involving Federal funding or a federal agency authorization**

The following information is provided to assist you with Section 7 compliance of the Federal Endangered Species Act (ESA). The ESA directs all Federal agencies "to work to conserve endangered and threatened species. Section 7 of the ESA, called "Interagency Cooperation," is the means by which Federal agencies ensure their actions, including those they authorize or fund, do not jeopardize the existence of any listed species."

The project falls within the range of the following federally listed/proposed/candidate species which have been identified by the U.S. Fish and Wildlife Service (USFWS) to occur in **Calhoun County, Michigan**:

#### **Federally Endangered**

**Indiana bat** – there does appear to be suitable habitat within 1.5 miles of the project. Indiana bats (*Myotis sodalis*) are found only in the eastern United States and are typically confined to the southern three tiers of counties in Michigan. Indiana bats that summer in Michigan winter in caves in Indiana and Kentucky. This species forms colonies and forages in riparian and mature floodplain habitats. Nursery roost sites are usually located under loose bark or in hollows of trees near riparian habitat. Indiana bats typically avoid houses or other artificial structures and typically roost underneath loose bark of dead elm, maple and ash trees. Other dead trees used include oak, hickory and cottonwood. Foraging typically occurs over slow-moving, wooded streams and rivers as well as in the canopy of mature trees. Movements may also extend into the outer edge of the floodplain and to nearby solitary trees. A summer colony's foraging area usually encompasses a stretch of stream over a half-mile in length. Upland areas isolated from floodplains and non-wooded streams are generally avoided.

**Management and Conservation:** Every March, the USFWS publishes [survey guidelines](#) to assist project proponents (both Federal and non-Federal) with conservation planning for Federally listed bats in Michigan. We strongly encourage project managers and their designated representatives to use the U.S. Fish and Wildlife Service (USFWS) online planning tool [Information for Planning and Consultation](#) (IPaC) to evaluate potential effects of proposed activities on listed bats and other Federally listed species in Michigan. Projects that complete consultation or coordination through IPaC automatically adhere to the recommendations provided in these guidelines and are not required to implement any additional conservation measures for listed bats.

**Snuffbox** – there does appear to be suitable habitat within 1.5 miles of the project. The state and federally endangered snuffbox mussel (*Epioblasma triquetra*) inhabits rivers and streams with cobble, gravel, or sand bottoms in swift currents and usually is deeply buried in the substrate. Glochidia, the parasitic larval stage of the mussel, are released from May to mid-July. In Michigan, the only host fish known for snuffbox is the log perch (*Percina caprodes*). In other parts of their range the banded sculpin (*Cottus carolinae*) is also a known host. After completing the parasitic stage and reaching adulthood, snuffbox remain relatively sessile on the river bottom, living between 8-10 years. The best time to survey for snuffbox is April through September.

**Management and Conservation:** the snuffbox mussel is sensitive to river impoundment, siltation, and disturbance, due to its requirement for clean, swift current and relative immobility as an adult. To maintain the current populations in Michigan, rivers need to be protected to reduce silt loading and run-off. Maintaining or establishing vegetated riparian buffers can aid in controlling many of the threats to mussels. Control of zebra mussels is critical to preserving native

## DRAFT - FOR REVIEW AND COMMENT

mussels. And as with all mussels, protection of their hosts habitat is also crucial. Because the life cycle of the snuffbox is inherently linked with that of the logperch in Michigan, conservation and management of this fish species is needed to ensure that of the snuffbox.

**Mitchell's satyr butterfly** – there does not appear to be suitable habitat within 1.5 miles of the project. The federally endangered and state endangered Mitchell's satyr butterfly (*Neonympha mitchellii mitchellii*) is restricted to calcareous wetlands known as prairie fens. In Michigan, this habitat is characterized by scattered tamaracks, poison sumac, and dogwood with a ground cover of sedges, shrubby cinquefoil, and a variety of herbaceous species with prairie affinities. Adult Mitchell's satyr butterflies are active two to three weeks each summer, with males emerging before females. Adult flight dates are from mid-June to mid-July. Larvae hibernate near the bottom of a sedge. The larval food plant is thought to be several species of sedge. The caterpillar is green with white stripes.

*Management and Conservation:* the primary threat to the continued survival of this species is habitat loss and modification. Many of the wetland complexes occupied currently have been altered or drained for agriculture or development. Wetland alteration is responsible for extirpating the single known satyr population in Ohio. Wetland alteration also can lead to invasion by exotic plant species such as glossy buckthorn (*Rhamnus frangula*), purple loosestrife (*Lythrum salicaria*), common buckthorn (*Rhamnus cathartica*), and the common reed (*Phragmites australis*). In addition, landscape-scale processes that may be important for maintaining suitable satyr habitat and/or creating new habitat, such as wildfires, fluctuations in hydrologic regimes, and flooding from beaver (*Castor canadensis*) activity, have been virtually eliminated or altered throughout the species' range.

**Northern long-eared bat** – Northern long-eared bat (*M. septentrionalis*) numbers in the northeast US have declined up to 99 percent. Loss or degradation of summer habitat, wind turbines, disturbance to hibernacula, predation, and pesticides have contributed to declines in Northern long-eared bat populations. However, no other threat has been as severe to the decline as White-nose Syndrome (WNS). WNS is a fungus that thrives in the cold, damp conditions in caves and mines where bats hibernate. The disease is believed to disrupt the hibernation cycle by causing bats to repeatedly awake thereby depleting vital energy reserves. This species was federally listed in May 2015 primarily due to the threat from WNS.

Although no known hibernacula or roost trees have been documented within 1.5 miles of the project site, this activity occurs within the designated WNS zone (i.e., within 150 miles of positive counties/districts impacted by WNS. Also, there does appear to be suitable habitat within 1.5 miles of the project.

Also called northern bat or northern myotis, this bat is distinguished from other *Myotis* species by its long ears. In Michigan, northern long-eared bats hibernate in abandoned mines and caves in the Upper Peninsula; they also commonly hibernate in the Tippy Dam spillway in Manistee County. This species is a regional migrant with migratory distance largely determined by locations of suitable hibernacula sites.

Northern long-eared bats typically roost and forage in forested areas. During the summer, these bats roost singly or in colonies underneath bark, in cavities or in crevices of both living and dead trees. Roost trees are selected based on the suitability to retain bark or provide cavities or crevices. Common roost trees in southern Lower Michigan include species of ash, elm and maple. Foraging occurs primarily in areas along woodland edges, woodland clearings and over small woodland ponds. Moths, beetles, and small flies are common food items. Like all temperate bats this species typically produces only 1-2 young per year.

*Management and Conservation:* Every March, the USFWS publishes [survey guidelines](#) to assist project proponents (both Federal and non-Federal) with conservation planning for Federally listed bats in Michigan. We strongly encourage project managers and their designated representatives to use the U.S. Fish and Wildlife Service (USFWS) online planning tool [Information for Planning and Consultation](#) (IPaC) to evaluate potential effects of proposed activities on listed bats and other Federally listed species in Michigan. Projects that complete consultation or coordination through IPaC automatically adhere to the recommendations provided in these guidelines and are not required to implement any additional conservation measures for listed bats.

**Federally Threatened**

**Eastern massasauga rattlesnake (EMR) – there does not appear to be suitable habitat within 1.5 miles of the project.** The project falls outside Tier 1/Tier 2 EMR habitat as designated by the U.S. Fish & Wildlife Service (USFWS). The federally threatened and state special concern Eastern massasauga rattlesnake (*Sistrurus catenatus*) is Michigan's only venomous snake and is found in a variety of wetland habitats including bogs, fens, shrub swamps, wet meadows, marshes, moist grasslands, wet prairies, and floodplain forests. Eastern massasaugas occur throughout the Lower Peninsula but are not found in the Upper Peninsula. Populations in southern Michigan are typically associated with open wetlands, particularly prairie fens, while those in northern Michigan are better known from lowland coniferous forests, such as cedar swamps. These snakes normally overwinter in crayfish or small mammal burrows often close to the groundwater level and emerge in spring as water levels rise. During late spring, these snakes move into adjacent uplands they spend the warmer months foraging in shrubby fields and grasslands in search of mice and voles, their favorite food.

Often described as “shy and sluggish”, these snakes avoid human confrontation and are not prone to strike, preferring to leave the area when they are threatened. However, like any wild animal, they will protect themselves from anything they see as a potential predator. Their short fangs can easily puncture skin and they do possess potent venom. Like many snakes, the first human reaction may be to kill the snake, but it is important to remember that all snakes play vital roles in the ecosystem. Some may eat harmful insects. Others like the massasauga consider rodents a delicacy and help control their population. Snakes are also a part of a larger food web and can provide food to eagles, herons, and several mammals.

*Management and Conservation:* protection of extant populations and suitable wetland and adjacent upland habitats is crucial for successful conservation of the Eastern Massasauga. Maintaining or restoring open habitat conditions is critical for this species. Fragmentation of suitable wetland-upland habitat complexes by roads or other barriers should be avoided or minimized. Land management practices such as timber harvesting, mowing, disk ing or prescribed burning should be conducted in such a manner so as to minimize the potential for adverse impacts to massasaugas (e.g., conducting management activities during the snakes’ inactive season (November through early March) or on days when snakes are less likely to be active on the surface during the active season). Protecting suitable hibernation sites also is critical.

USFWS Section 7 Consultation Technical Assistance can be found at:

<https://www.fws.gov/service/esa-section-7-consultation>

The website offers step-by-step instructions to guide you through the Section 7 consultation process with prepared templates for documenting “no effect” as well as requesting concurrence on “may affect, but not likely to adversely affect” determinations.

Please let us know if you have questions.

## APPENDIX D

### CITY SPECIAL PROVISIONS

DRAFT - FOR REVIEW AND COMMENT

**APPROVED**

By Katelyn Reyes, P.E. at 3:55 pm, Feb 20, 2024

1 of 15

JTG/City of Battle Creek

**I General****1 Description**

This work shall consist of excavating, installing, testing, disinfecting, and backfilling water mains and appurtenances and providing as-built plans of the completed work. The Contractor shall furnish all labor, equipment and materials necessary to properly complete the work as shown on drawings and as specified herein.

All work and materials shall be in accordance to the requirements per Section 823 of the 2020 *Standard Specifications for Construction* by the Michigan Department of Transportation.

**II Construction Materials and Products****1 Shop Drawings**

- a Shop drawings and manufacturers detailed literature shall be submitted to the Engineer for approval before any work may begin. These drawings shall detail the thrust restraint design for all fittings and pipe. Restraint shall be restraint joint pipe mechanism based on "Thrust Restraint Design for Ductile Iron" Sixth Edition 2006 as published by the Ductile Iron Pipe Research Association. Thrust blocks shall not be considered for calculating restraint design. The design shall be based on 150 psi or two times the working pressure, whichever is greater.

**2 Pipe and Fitting Identification**

- a Each pipe, fitting or special section shall have plainly and permanently marked thereon:
  - Pipe class.
  - Thickness class.
  - Manufacturer's name or trademark.
  - On bends, the angle turned thereby.
  - Identification of specials to show proper location in line.
  - On beveled pipe, amount of bevel and point of maximum bevel.
  - Each end of each bevel end pipe, fitting, or special shall be marked with a stripe of paint, approximately 1½ inches wide and 2 feet long applied along the top centerline.
  - The Contractor shall be responsible for the handling and storing of all materials per manufacturer's recommendations and to prevent deterioration and contamination from exposure to the weather and other conditions.
  - All damaged parts upon delivery or from storage shall be replaced at no cost to the owner.

**3 Ductile Iron Pipe**

- a AWWA C151 minimum thickness Class 52 Pipe, cement – mortar lined and bituminous coated inside and outside in accordance with AWWA C104 and meeting NSF-61 rating.
- b Joints:
  - i. Slip-on compression type joint or mechanical joint meeting AWWA C111
  - ii. Rubber gaskets shall conform to ANSI A21.11, AWWA C111, and AWWA C115
  - iii. In contaminated areas gaskets shall be nitrile or fluoroelastomer.
- c Fittings:
  - i. Full Body meeting AWWA C110

- ii. Compact meeting AWWA C153
- iii. All fittings to have mechanical joints meeting AWWA C111 and restrained.

**See Appendix A, City of Battle Creek Approved Material Listing for joint restraints, ductile iron pipe, and pipe fittings.**

**4 Valves and Boxes.**

**Resilient Wedge Gate Valves.**

Required on 4" mains to 12" mains, or as directed by the Engineer.

- a. All gate valves shall conform to the latest revision of AWWA Standard C509 or C515 covering resilient seated gate valves. Valves shall be rated 250 psi. All ferrous components shall be ductile iron.
- b. Gate valves shall have an unobstructed waterway equal to or greater than the full nominal diameter of the valve.
- c. The valves shall be non-rising stem, opening by turning stem Left (counter clockwise) and provided with a 2" square operating nut with the word Open and an arrow cast in metal to indicate the direction to open. Operating nut shall be constructed of ductile iron and shall have four flats at the stem connection.
- d. The wedge shall be of ductile iron completely encapsulated with rubber. The wedge shall be symmetrical and seal equally well with flow in either direction.
- e. The sealing rubber shall be permanently bonded to the cast iron wedge to meet ASTM tests for rubber metal bond ASTM D429.
- f. Valves shall be supplied with o-ring seats at all joints. No flat gaskets allowed.
- g. Stems shall be cast bronze with integral collars in full compliance with AWWA. The stem stuffing box shall be o-ring seal type with 2 o-rings located above the thrust collar and 1 o-ring below. The 2 o-rings above the collar shall be replaceable with the valve fully open and at its full working pressure.
- h. There shall be 2 low torque thrust bearings located above and below the thrust collar. The stem nut shall be independent of the wedge and shall be made of solid bronze. There shall be a smooth, unobstructed waterway free of all pockets, cavities and depressions in the seat area.
- i. The body and bonnet shall be coated with fusion bonded epoxy both interior and exterior, complying with AWWA C550 and be NSF 61 approved. Each valve shall have the manufacturers' name, pressure rating and the year manufactured, cast on the body.

**See Appendix A, City of Battle Creek Approved Material Listing for resilient wedge gate valves.**

**b Butterfly Valves.**

Required on 16" mains or larger, or as directed by Engineer.

- i. Butterfly valves shall comply with the latest revision of AWWA Standard C-504 Class 150B.
- ii. Butterfly valves shall be built to withstand a 150 psi working pressure.
- iii. Butterfly valve bodies shall be cast iron ASTM A126 Class B with mechanical joint ends complete with accessories (rubber, bolts, and glands).

JTG/City of Battle Creek

February 2024

- iv. Butterfly valve discs shall be ductile iron ASTM A536 Grade 65-45-12. All internal cast iron parts exposed to flowing water shall be coated with black asphaltic.
- v. Butterfly valve body seating surface shall be stainless steel ASTM A276, Type 304. The mating seating shall be natural rubber or "Buna N Rubber" meeting the requirements of ASTM D2000. Seating shall be a 360 degree resilient seat fully field adjustable and field replaceable without valve disassembly.
- vi. Butterfly valve shafts shall be single solid stainless steel ASTM 276, Type 304. The shaft and disc shall be connected by means of O-ring sealed tapper pin held in place by a self-locking nut. The disc shall be held in the center of the valve by factory set thrust rings or collars. Shaft seals shall be of O-ring type or V-type packing.
- vii. Installation is for buried service. The valve shall be key operated with a 2" square operating nut open left (counter clockwise) and shall be located on the main side nearest to the edge of road or curb.

**See Appendix A, City of Battle Creek Approved Material Listing for approved product listing for butterfly valves.**

**c Valve Boxes.**

All buried valves shall be provided with valve boxes. Valve boxes shall be cast iron, 2-piece with screw type extension sleeve adjustment and suitable for the depth of cover required by the drawings. Valve box shafts shall be 5-1/4 inches in diameter and shall have a minimum thickness at any point of 3/16 inch. Valve box bases shall encapsulate the entire valve stem assembly, but not rest directly on the valve. Covers shall be of a round plug type suitable for easy removal, and shall have cast thereon the word "WATER."

- i. All parts of valve boxes, bases and covers shall be coated by dipping in hot asphalt varnish.

**See Appendix A, City of Battle Creek Approved Material Listing for approved product listing for valve box castings.**

**d Service boxes.**

Service boxes for 1 inch curb stops shall be two-piece 6500 Series Tyler Union 95-E which has a maximum height of 64 inches. Services deeper than 64 inches must utilize one of the following extensions: Tyler 151, 152, 153, or 154.

Service box for 2 inch curb stop shall be cast iron, 2-piece with screw type extension sleeve adjustment and suitable for the depth of cover required by the drawings. Valve box shafts shall be 5-1/4 inches in diameter and shall have a minimum thickness at any point of 3/16 inch. Valve box bases shall encapsulate the entire curb stop assembly, but not rest directly on the curb stop. Covers shall be of a round plug type suitable for easy removal, and shall have cast thereon the word "WATER."

1 inch services shall be installed with a "Vadle Curb Box Lock" as per the manufacturer's recommendation and be included in the cost of other items.

**See Appendix A, City of Battle Creek Approved Material Listing for approved product listing for valve box castings.**

**6 Fire Hydrant Assemblies.**

- a. Hydrants shall conform to AWWA C502, as amended to date. All hydrants shall be "breakable" or "traffic" design, with replaceable sections or components of the barrel and stem.
- b. Hydrants shall have a compression type shut-off, opening against the pressure and which will remain closed in the event of accident, damage or breaking of the hydrant barrel.
- c. Hydrants are to have a minimum 5 $\frac{1}{4}$  inch valve opening with a 6 inch mechanical joint inlet and a 6 inch mechanical joint auxiliary gate valve between the water main and the hydrant. Auxiliary gate valves shall be provided with a valve box.
- d. Hydrants shall be provided with two or more drain outlets, which are part of the main valve mechanism. The drain outlets are to be tapped and the drain plugs are to be threaded brass and installed at the time of delivery. Removal of drain plugs shall be done by the Contractor prior to backfill unless groundwater is encountered or the Engineer directs otherwise. Where necessary for drainage, aggregate meeting the requirements for MDOT Class 4G, 34R, or 34G as specified in Section 902 of the MDOT 2020 Standard Specifications for Construction, shall be placed at the base of the hydrant.
- e. Hydrants shall have O-ring packing.
- f. Hydrants, including tops and nozzle caps, shall be painted chrome yellow.
- g. Hydrants shall open left (counter-clockwise). Hydrants shall have two standard 2 $\frac{1}{2}$  inch hose nozzles and one 4 $\frac{1}{2}$  inch pumper nozzle with National Standard Fire Hose threads and shall be equipped with caps, cap gaskets and chains.
- h. Operating nuts are to be pentagon in shape, measuring 1 $\frac{1}{2}$  inches from flat to point. Height of the nut shall be at least 1 inch.
- i. Hydrants shall be designed so that the direction of the nozzles can be reoriented without digging up the assembly.
- j. Hydrants shall be designed so that an extension to the barrel can be added above ground without excavation. Extensions shall be available in 6 inch increments.
- k. Hydrants shall be designed so that no excavation is needed to remove the main valve and movable parts of the drain valve.
- l. The bronze valve seat shall be threaded into a bronze drain ring or shoe bushing to provide ease of removal of the valve and valve seat on any hydrant that requires removal of the valve seat to replace the valve.

**See Appendix A, City of Battle Creek Approved Material Listing for approved product listing for valve box castings.**

**7 Water Service Connections.**

- a. Copper pipe service connections of 1 inch or 2 inch, shall be in accordance with ASTM Specification B88, or Federal Specification WW-T-799; "Type K", soft tempered copper or HDPE pipe in accordance with ASTM F876, F877, F2023, F2657, constructed per AWWA C 904, and meet ANSI/NSF Standard 61 &14.
- b. Plastic service connections of 1 inch or 2 inch shall be SDR 9 in accordance with ASTM D2737, constructed per AWWA C 901, and meet ANSI/NSF Standard 61. Pipe dimensions shall meet copper tubing size standards.
- c. Corporation stops shall be bronze, AWWA C-800 Table 1 standard inlet with AWWA standard outlet for compression fitting.
- d. Curb stops shall be bronze, AWWA C-800 standard for compression fittings.
- e. Service clamps for 2 inch service connections shall be of the double strap type, ductile iron, with all stainless steel or galvanized parts, similar to Romac Style 202NU.
- f. Fittings for copper water services shall be of the compression type. Soldered joints shall not be used where pipe is buried.

**See Appendix A, City of Battle Creek Approved Material Listing for approved product listing for valve box castings.**

**8 Manhole Covers.**

Covers shall meet the requirements of MDOT "Q" cover and the City of Battle Creek's Standard Water Main Detail sheet that includes the city logo and the words "WATER" imprinted into the casting.

**9 Pipe Testing.**

At the discretion of the Engineer, pipe shall be tested for conformity with AWWA and ASTM specifications. The Engineer may choose one pipe per 1,000 feet of construction. The entire costs of testing shall be the Contractor's responsibility, whether performed by an independent testing lab or as part of the manufacturer's quality control.

**10 Disinfection Materials.**

- a. **High Test Calcium Hypochlorite (HTH, "Perchloren", "Maxochlor", "Pittchlor").** Approved only for tablet and granular method- Powder and water shall be mixed to form a 1 percent chlorine solution (10,000 ppm), pumping solution at a constant rate into the water main while bleeding off the water at the extreme end.
- b. **Sodium Hypochlorite (Liquid Chlorine).** - Liquid chlorine conforming to AWWA B300 may be applied to the water main much the same way as the hypochlorite solution listed above.
- c. **Chlorine Gas.** - Chlorine gas shall not be used.

**III Construction Methods**

**1 Scope of Work**

This section consists of excavation and backfill; placement of pipe, fittings and appurtenances; and disinfection of the completed water system per Section 823 of MDOT 2020 Standard Specification for Construction, 10 State Standards, AWWA C600 and C605 along with the following specifications. It is

the Contractor's task to proceed with the construction as rapidly and as expeditiously as possible and to present the City with a complete, sound, and operable piping system.

- a. The city will notify customer of shutoffs outside the project limit, but necessary to complete the work. The contractor will be required to notify residences within the project limits via door hangers that the city will provide, but contractor must complete the information for times and durations of shutoffs along with providing contact information for coordination of work.
- b. Contractor will be allowed to operate valves within the project limits and as designated by the Engineer until acceptance of the completed water main system.
- c. Salvaged material shall be made available to the City of Battle Creek at a designated location within the project limits or other location as agreed to in the Progress Meeting. Written notification of the material's availability shall be from the Contractor to the Project Engineer, at which the city will be given 14 days to remove the salvaged material after which it becomes the property of the Contractor. Salvage material includes, but not limited to, hydrants, manhole castings, valves, boxes, and other appurtenances.

## **2 Trench Excavation.**

Water pipe shall be laid according to Utility Trenches detail F or G, as shown on MDOT Standard Plans R-83-C unless otherwise noted. Pedestrian crossings shall be erected and maintained by the Contractor where designated by the Engineer. The Contractor shall provide access to homes, commercial, industrial, etc. establishments as soon as backfill is completed. Said access shall always be provided during periods when the Contractor is not performing construction operations.

No trench shall be left open and unattended when pipe work is not being executed within the trench unless under an emergency in which case the trench shall be closed by fencing, barricading, or other methods until the emergency is resolved. In no case shall the trench be left open overnight or on a weekend or holiday.

Undercutting unstable soil conditions within the trench shall be per Section 402.03.A of the current MDOT Standard Specifications for Construction and as directed by the Engineer.

## **3 Dewatering.**

Dewatering of trenches shall be included as part of the water main installation with no separate payment. Dewatering shall be performed as necessary and shall conform to Section 402 of the current MDOT Standard Specifications for Construction, with the following additional requirements.

- a. The Contractor shall perform his dewatering operations whenever groundwater conditions create an unstable trench bottom. An unstable trench bottom is defined as "Conditions that prevent placement of pipes true to line and grade."
- b. The method of dewatering will be subject to review by the Engineer.
- c. The City will be responsible for temporary service of an individual water supply where these supplies are cut off due to lowering of the water table during construction. The Contractor shall not lower the water table unnecessarily.
- d. All dewatering wells that have a bore hole diameter of two inches or more shall be plugged and abandoned by the following method or any method that has been approved in writing by the Michigan Department of Public Health, in accordance with the State of Michigan's "Groundwater Quality Control Rules, Part 4 Dewatering Wells R 325.1761," Public Act 368 of 1978.

- e Once the casing and screen have been removed from the bore hole, an injector pipe shall be installed in the bore hole to the bottom of the gravel pack material. Neat cement or bentonite slurry shall be pumped through the injection pipe until the material is five feet above the gravel pack material or four feet below the existing gravel level. The remainder of the bore hole shall be plugged with native soil.
- f Any water removed from the trench or the water main shall be disposed of in such a way as not to damage property, create a public nuisance or a health problem. Contaminated water removed as part of the dewatering process shall be done to MDEQ Part 201 Standards.

#### **4 Joint Restraint.**

Follow approved shop drawings and manufacturer's recommendations based on "Thrust Restraint Design for Ductile Iron" Seventh Edition 2016 as published by the Ductile Iron Pipe Research Association and AWWA Manual M23, "PVC Pipe Design and Installation". Thrust blocks may be incorporated into the restraint system, but will not be considered for calculating restraint design

#### **5 Installation of Pipe and Fittings**

Before installation, the pipe shall be inspected for defects and any section of pipe or fittings found to be defective, before or after laying, will be rejected and replaced with sound pipe without additional expense to the City.

Water pipe shall be laid according to Utility Trench Detail F or G, as specified, on MDOT Standard Plans R-83-C with a cover depth of no less than 5.5 feet. The interior of the pipe and fittings shall be thoroughly cleaned of foreign matter before being lowered into the trench and shall be kept clean during laying operations by plugging the ends or by other approved methods. When work is not in progress, the open ends of the pipe and fittings shall be securely closed so that no trench water, earth, animals, or other substances will enter the pipes.

No pipe or fittings shall be placed in water or when the trench or weather conditions are unsuitable for work except by permission of the Engineer.

The full length of each section of pipe shall rest solely upon the pipe bed, with recesses provided to accommodate the bells and joints.

Deflections from a straight line or grade, as required by vertical curves, horizontal curves, or offsets, shall not exceed tolerances recommended by the pipe manufacturer. If the alignment requires deflections in excess of the manufacturer's recommendations, special bends or a sufficient number of shorter lengths of pipe shall be furnished to provide the angular deflection required. Frequent or abrupt changes in the slope of the pipe, even if necessary to follow the existing ground surface elevations, will not be permitted.

Pipe shall be placed with bell ends facing in the direction of laying, unless otherwise approved by the Engineer.

Pipe shall be placed with at least 10-foot horizontal clearance from existing sewers and shall have a minimum clearance of 18-inches, as measured from outside edges of pipes, when crossing sewers and shall utilize one full length of water pipe centered at the crossing.

Jointing of the various pipe materials and types shall be made in accordance with the manufacturer's recommendations.

**6 Cutting Pipe**

Cutting pipe for inserting valves, fittings, etc. shall be performed in a neat and workmanlike manner, without damage to the pipe or lining, and so as to leave a smooth end at right angles to the axis of the pipe.

For cast iron and ductile iron pipe, cutting shall be performed with a power saw, or a roller or shear type cutter for pipe sizes up to 20 inches in diameter. When machine cutting is not available for cutting pipe 20 inches in diameter or larger, the electric arc cutting method will be permitted, using a carbon or steel rod. Only qualified and experienced workmen shall perform this work.

For asbestos-cement pipe, cutting shall be performed by power saw, hand saw, abrasive disks or with a special asbestos-cement cutting tool. All piping cutting tools must be of the true cutting variety. Under no circumstances is the pipe to be cut with a roller or shear type cutting tool.

**7 Connections to Existing Water Mains**

Connections shall be made with line pressure on or off according to the Plans or Proposal. Existing pipelines shall be adequately supported during the cutting operations and prior to placement of backfill.

Prior to cutting existing pipelines, the surface of the existing pipe shall be thoroughly cleaned by wire brushing and scraping. When cut-in is made under pressure, the existing pipe surface shall be washed down with a 4 percent solution of chlorine prior to installing the cutting-in tee. All fittings, pipe, valves, etc. used in the connection that cannot be disinfected during normal water main chlorination shall be swabbed out with a 4 percent or stronger solution of chlorine, such as standard laundry bleach, during assembly. Care shall be exercised in order to prevent contamination of the existing water mains and failure to comply with this requirement will necessitate chlorination of the existing water mains at the Contractor's expense.

After the connection is made, the Contractor shall flush sufficient water through the connection to effect removal of the chlorine solution.

All valves will be turned to the open position at the final inspection.

**8 Valve Boxes**

The valve box shall not transmit shock or stress to the valve when the box cover is flush with the surface of the pavement or other such level as may be directed. The base section of the valve box shall be set two inches above the flanged bonnet joint of the valve and accurately centered on the valve operating nut.

**9 Hydrants**

Hydrants shall stand plumb and have hose nozzle parallel with the roadway, with the pumper nozzle facing the roadway.

Hydrants shall be installed in conformance with AWWA C-600 and AWWA M-17. Hydrants shall be set to the established grade, with the breakaway no more than 8 inches above the finished topsoil grade or as directed by the Engineer. Nozzles should be placed at least 20 inches above the finished topsoil grade. Hydrants set with elbow or hydrant tee shall be rotated 90 degrees to conform to the above specifications. Joint restraints shall be consistent with Section III(4) of these specifications.

At least 3 feet of horizontal clearance shall be provided around each hydrant from any above ground obstacles such as utility poles, trees, signs, fencing, walls, etc.

Hydrants must be connected to the main with a 6-inch branch and controlled by an independent gate valve. In the case of relocated four-inch hydrants, four-inch valves shall be used. This Valve on Branch

shall be located no less than 18 inches or greater than 36 inches from the hydrant unless otherwise shown on the plans. Each Valve on the branch shall be left open prior to pressure testing and disinfecting and shall be left open prior to final acceptance.

A drainage pit shall be placed on both sides of the bottom inlet at the drainage waste opening. The pit shall be 2 feet radial from the waste opening, at least 90 degrees in width, and 3 feet deep. The pit shall be completely filled with specified aggregate to an elevation 6 inches above the waste opening. Drainage wasting openings shall be plugged if hydrant is placed in an area of known contamination or in groundwater.

## **10 Water Service**

### **A) Serving a building with a verified non Lead/Galvanized water service**

All water services shall originate at and include the tap into the water main in the street with a corporation stop and terminate with the connection to the existing service with a curb stop and service box located within 7 feet outside of the property line. All services shall be tapped at the 2 o'clock or 10 o'clock positions. Services shall be installed at a depth of 5 feet below the final grade. Short services shall be installed by boring. Borings may be made by the "Augur" or "Missile" methods. Services installed under existing concrete or bituminous surfaces shall be installed by boring. Services installed under gravel surface may be by open trench or boring.

Where soil conditions in open trenches are not suitable for copper pipe, the pipe shall be embedded in Granular Material Class III and backfilled as specified.

All services shall be observed for leaks and disinfected (chlorinated) before they are covered.

Curb stops will be placed in such a way that when turned off the key position is parallel to the centerline of the right of way that the water line services.

### **B) Serving a building with a verified Lead/Galvanized water service.**

**Partial Lead service line replacements will not be allowed.**

**The public side of the water service shall be done in accordance to the above section 10A with the following pertaining to a private side water service;**

This item shall consist of the work required to remove and replace a lead or galvanized water service on private property that is or has been connected to a public side lead service. These specifications will be in conjunction with the ANSI/AWWA C810-17 and the City's Special Provision for Water Main.

The contractor's work shall be under the supervision of a Michigan licensed plumber who will be required to obtain a permit from the City's Inspection Division.

The City of Battle Creek (City) will assist the contractor on obtaining the homeowner's consent by providing the contact information and consent documentation that must be signed by the homeowner before work can be performed. The contractor shall schedule a home visit to determine needed equipment and material. The City shall be notified of the visit, but is not required to attend. With this visit, the contractor shall investigate the service line for any improper electrical grounding and make appropriate notifications to Consumers Energy and/or Electrical Inspector. The contractor is not expected to work on improper grounding to the plumbing system.

The contractor will be expected to have contacted Miss Dig, processed plumbing permits and be ready to perform all necessary work required for replacing the private side water service within two weeks after the home visit.

JTG/City of Battle Creek

February 2024

Replacement of the water service line shall be from curb stop to the inside meter. The customer shall not be without water for more than 12-hours and will be provided by the contractor with proper flushing techniques as supplied by the City. The contractor shall have the option of open trench or trenchless methods for removing the old service and replacing with a new service of specified material. The old service shall be completely removed from curb stop to the meter and properly disposed of or recycled. Removal of the old service is included with replacement pay items listed below.

Contractor shall coordinate with City's meter shop for meter replacement if needed. Installation of a new meter, provided by the City, will be included in this work. Wiring the meter read, sealing and inspection will be by the meter shop within 24-hour notice from the contractor.

Restoration to yard and landscaping shall be included in other items. Any repairs or cleanup within the interior portion of the home shall be covered with the Project Cleanup item. The contractor will be responsible for all claims from the homeowner.

Liquidated damages will be assessed at \$50.00/day for no available water after 12-hours of no service.

Meters discovered to be in a pit shall be raised up to an acceptable level per the below Residential Meter Pit Detail and will be paid per the Relocate Water Meter from Pit pay item listed below. This item will include all necessary struts, hangers, piping and fittings for connection of the service line to the relocated meter and to existing house side plumbing.

## 11 Seasonal Suspension

In the event that hazardous or nuisance conditions arise during the winter from the previous construction season's water main work, and such conditions are not corrected by the Contractor, the City shall notify the Contractor through the Engineer, in writing, that a deficiency exists and the specific location thereof. The Contractor shall, immediately upon such notification, correct the defective condition to the satisfaction of the City. Should the Contractor not correct the defective condition promptly, the City may perform the required maintenance and deduct their incurred costs from the contract price.

If the Contractor so desires, and by prior written consent of the City, he may elect not to perform such inspections and/or maintenance, due to prohibitive travel distances or shortage of off season manpower. Should the Contractor desire to initiate this exception, the City may perform the winter inspections and maintenance itself and deduct his incurred costs from the contract price.

## IV Hydrostatic Testing

### 1 General

The Contractor shall pretest and be satisfied that all lines are ready for testing before requesting test inspection. The Contractor shall provide all necessary equipment and perform all work required in connection with the tests.

### 2 Hydrostatic Testing

The test shall conform to AWWA C-600 for ductile iron pipe and or AWWA C-605 for PVC pipe and Section 823.03 U. of the 2020 Standard Specifications for Construction by MDOT for all newly laid pipe and fittings except that the test pressure shall not vary by more than 5 psi for the duration of the test. The allowable makeup water to match starting testing pressure (in inch-pound) is:

$$L = SD(\sqrt{P})/148,000$$

Where:

L = testing allowance (makeup water in gph)

S = length of pipe tested (ft)

D = nominal diameter of pipe (in.)

P = average test pressure during the hydrostatic test (measured with gauge in psi)

## V Disinfection of the System

### 1 General

Disinfection shall be by chlorination and/or other methods as approved by the Engineer after pressure testing and flushing. The disinfection shall conform to the current AWWA C-651 standards.

### 2 Chlorination

All new water lines shall be chlorinated. The Contractor shall furnish all labor, equipment, and materials necessary for effective chlorination of the water mains.

### 3 Materials

- a High Test Calcium Hypochlorite (HTH, "Perchloren", "Maxochlor", "Pittchlor"). - Powder and water shall be mixed to form a 1 percent chlorine solution (10,000 ppm), pumping solution at a constant rate into the water main while bleeding off the water at the extreme end.

- b Liquid Chlorine. - Liquid chlorine conforming to AWWA B-301 may be applied to the water main much the same way as the hypochlorite solution listed above.
- c Chlorine Gas. - Chlorine gas shall not be used.

#### 4 Method of Chlorination

The method of chlorination shall be in accordance with AWWA C651 and per Section 823.03(V) of the *2020 Standard Specifications for Construction* by the Michigan Department of Transportation except that prior to disinfection the flushing shall take place at a velocity of 3 feet per second and two samples shall be taken 24 hours apart for every section of pipe or 1,200 linear feet of pipe. Bacteriological samples shall be taken at the end of the main and from each branch.

#### VI Measurement and Payment

The complete work as measured for Water Main will be paid for at the contract unit prices for the following items (pay items). Each item includes supplying all necessary material, equipment, and labor.

Pay Item.....	Pay Unit
Hydrant, Rem .....	Each
Water Main, Rem .....	Foot
Water Main, __ inch, Cut and Plug .....	Each
Gate Well, Rem .....	Each
Water Service, Rem.....	Each
Fire Hydrant .....	Each
Gate Valve and Box, __inch .....	Each
Water Main, __inch, Tr Det __ .....	Foot
Water Serv.....	Each
Water Serv, Long.....	Each
Water Serv, 2 inch .....	Foot
Gate Box, Adj, Case __ .....	Each
Water Main Tie in.....	Each
Live Tap, __inch by __inch.....	Each
Pressure Test and Disinfect.....	Each
Water Main Tee, __inch by __inch.....	Each
Water Main Reducer, __inch by __inch.....	Each
Water Main Cross, __inch by __inch.....	Each
Water Main Bend, __Deg, __inch .....	Each
Replace Lead or Galvanized Water Service, 1 inch.....	Each
Replace Lead or Galvanized Water Service, 2 inch.....	Each
Relocate Water Meter from Pit .....	Each

#### 1 General

The actual number of units of each unit price item of work actually performed may be more or less than the number stated in the Bidding Schedule of the Proposal, or included in the Contract, but no variation in the Contract unit price will be made on that account. Payment will be made only for the actual number of units incorporated in the work, or for the actual number of units of work performed, and at the Contract unit price for each such unit with measurement for payment made as defined in the following paragraphs. Measurement for payment of work done on a unit price basis will be as follows.

- A. **Hydrant, Rem.** Removing Hydrants will be paid for on an each basis. All existing hydrants will remain the property of the City and will be salvaged
- B. **Water Main, Rem.** Removing water main will be paid per foot of water main removed and will include all excavation needed and hauling from site.

- C. **Water Main, Cut and Plug.** The unit price for water main, cut and plug includes the cost of cutting the existing water main, providing and placing the required plug and thrust blocks.
- D. **Gate Well, Rem.** Removing gate wells will include complete removal of the water valve pit and all surrounding heavy, saturated material
- E. **Water Service, Rem.** Removal of water service shall be from the corporation at the main to the right-of-way and will be paid for on an each basis. Salvaging existing curb boxes for the city's use shall also be included in this item
- F. **Fire Hydrant.** Fire hydrants will be paid for on an each basis. The payment for fire hydrant assemblies includes the hydrant, main line by 6 inch tee, 6" resilient wedge valve and box, rodding, thrust restraint, aggregate, hydrant extension kits and other accessories necessary to complete the installation to proper grade and specifications
- G. **Gate Valve and Box, \_\_ inch.** The unit prices Gate Valve and Box, of the types and sizes required, include the cost of providing and installing the valve and valve box, complete and ready for use.
- H. **Water Main**
  - a. **Water Main, \_\_inch, Tr Det \_\_.** Water main, of the diameter, class, and trench detail specified, will be measured in place, by length in linear feet, from center to center of cross mains with no deductions in length for intermediate structures. Payment shall include any dewatering or trench bracing/sheeting necessary along with any necessary restraints. Excavation and backfill will not be measured separately but shall be included as a part of the item of water main furnished and installed. Price shall include any necessary tracer wire.
- I. **Water Services**
  - b. **Water Serv.** Includes the tap, corporation, saddle, curb stop, service box, tracer wire and service pipe from within 5' of the ROW to the short side of the water main.
  - c. **Water Serv, Long.** Includes the tap, corporation, saddle , curb stop, service box, tracer wire and service pipe from within 5' of the ROW to the long side of the water main.
  - d. **Water Serv, 2 inch.** Shall be in addition with the **Water Serv** pay item for placing service pipe and includes the saddle and attachment to the main. Tap, corporation, curb stop, tracer wire and service box from within 5' of the ROW will be included with the **Water Serv** pay item.
- J. **Gate Box, Adj. Case\_\_.** Case 1 refers to structures located in hard surfaced travel areas and unit price includes saw cutting, removing and replacing existing pavement, curb, or curb and gutter, and adjusting the water shutoff or gate box to final grade. Case 2 refers to structures located outside existing pavement, curb or curb and gutter and unit price includes restoring disturbed vegetated or sidewalk areas.
- K. **Water Main Tie in.** Connection of a new water main to an existing water main will be paid on an each basis for each connection made as noted on the plans. Payment includes all items necessary to complete the work including excavation and backfill, cutting and removing existing water main, all fittings, reducers, bends, and sleeves with restraint necessary to align new main with existing main.
- L. **Live Tap, \_\_inch by \_\_inch.** The unit price for Live Tap, of the size required, includes the cost of providing and installing the valve, tapping sleeve, all necessary restraints, and valve box, complete and ready for use. This work includes the complete live tapping procedure.
- M. **Pressure Test and Disinfect.** Pressure Test and Disinfect Water Main will be paid once per location approved by the engineer. If the main fails to pass the first pressure and disinfectant tests, further tests shall be made at the Contractor's expense. Payment for flushing and disposal of the disinfectant chlorinated water in accordance with environmental regulations is included in this item.
- N. **Appurtenances.** Water main tees, reducers, crosses, bends and other appurtenances shown on plans but not listed as bid items will be included with the water main items.
- O. **Replace Lead or Galvanized Water Service, 1 and 2 inch.** The work for placing one or two inch water services from curb stop to meter shall be paid per each. This item will include all necessary piping and fittings for connection of the service line to the meter and to existing house side plumbing. Service tubing and fittings shall be per the City's Special Provision for

JTG/City of Battle Creek

February 2024

Water Main. Plumbing material within the building shall be as specified in the current edition of the Michigan Residential Plumbing Code.

**P. Relocate Water Meter from Pit.** Meters discovered to be in a pit shall be raised up to an acceptable level per the Residential Meter Pit Detail. This item will include all necessary struts, hangers, piping and fittings for connection of the service line to the relocated meter and to existing house side plumbing.
